Guided learning hours:	15
Unit reference number:	J/502/4299

# Unit purpose and aim

This is the ability to make the best use of e-mail software to safely and securely send, receive and store messages.

This unit is about the skills and techniques to use a range of basic e-mail software tools to send, receive and store messages for straightforward or routine activities. Any aspect that is unfamiliar will require support and advice from others.

E-mail tools and techniques will be defined at this level as 'basic' because:

- the software tools and functions will be predetermined or commonly used; and
- the techniques used will be familiar or commonly undertaken.
- An activity will typically be 'straightforward or routine' because:
- the task or context will be familiar and involve few factors (for example, time available, audience needs, content, structure); and
- the input and output of information will be predetermined by the person supervising the task.

# Assessment

All ITQ units may be assessed using any method, or combination of methods, which clearly demonstrates that the learning outcomes and assessment criteria have been met. Assessments must also take into account the additional information provided in the unit Purpose and Aims relating to the level of demand of:

- the activity, task, problem or question and the context in which it is set;
- the information input and output type and structure involved; and
- the IT tools, techniques or functions to be used.

See the Assessment and postal moderation section of the <u>ITQ Centre Handbook</u>.

### Evidence requirements

Candidates must complete the Evidence Checklist without gaps for this unit unless they are using one of the live OCR-set assignments to generate the evidence.

Individual unit checklists are available to download from the qualification webpage (see forms).
