

CLARIFICATION OF CLAIT ASSESSMENT REGULATIONS

How many attempts at one unit assignment is a candidate allowed?

A candidate is allowed one attempt at each different unit assignment.

What does OCR consider to be a single attempt?

An attempt is defined as the point at which a candidate begins the assessment session up to the point at which the candidate submits all necessary printouts required for the unit to the Tutor.

Until a candidate submits a required printout to the tutor, there is still an opportunity to go back and correct any errors on that print, including an opportunity to reprint.

What does OCR consider to be an assessment session?

An assessment session is the total duration required by the candidate to complete the assessment, to retrieve all necessary printouts required and to submit these to the tutor.

Can the assessment session be split?

The assessment session can be split across shorter more manageable sessions to suit the need of the candidate or the centre's lesson plans. Centres should ensure all assessment material and work in progress is kept secure in any intervening periods.
