

Sociology

Advanced GCE

Unit **G674**: Exploring Social Inequality and Difference

Mark Scheme for January 2013

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

Question			Answer	Marks	Content	Guidance
						Levels of response
1			<p>AO1: Knowledge and Understanding</p> <p>Snowball sampling is the selection of people to take part in the research by finding people on the recommendation of others, usually through personal contacts. It is sometimes referred to as respondent-driven sampling or chain sampling. There is generally no sampling frame. The method is a form of purposive sampling and is a type of non-probability sampling.</p> <p>The sample is the group of people selected from the target population for a particular study. The population refers to all of the members of the group which is of interest to the research or of relevance to the study. The sampling frame is the list of people who make up the target population from which the sample is chosen. The sample size is the number of people chosen to take part in the study.</p> <p>Positivist, interpretive, realist, feminist and other research perspectives all use snowball samples to gather quantitative and qualitative data, though they are more often associated with qualitative/interpretive approaches. Snowball samples are used:</p> <ul style="list-style-type: none"> • When the research population is not easy to find or contact eg deviant groups or criminals; very sensitive areas of research eg victims of abuse 	10	<p>Candidates may give examples of different types of sampling techniques to illustrate their answers in comparison to snowball samples, including:</p> <ul style="list-style-type: none"> • random • stratified • quota • purposeful <p>Candidates may refer to concepts such as:</p> <ul style="list-style-type: none"> • collection and recording of data • data analysis • quantitative and qualitative approaches to evidence and data • validity • reliability • practicality • representative (sample of the wider population) • bias in sampling • generalise • population • other relevant response 	<p>Level 5 (9–10 marks)</p> <p>Candidates show an excellent knowledge and understanding of the nature, purpose and uses of snowball sampling. The response demonstrates detail and accuracy of a wide range of sociological material on snowball sampling with a strong focus on sociological concepts and/or theory. Candidates draw upon information from the source material and their wider knowledge. The quality of written communication will be excellent presenting appropriate material in a logical, accurate and coherent manner, with very few errors of grammar, punctuation and spelling.</p> <p>Level 4 (7–8 marks)</p> <p>Candidates show a very good knowledge and understanding of the nature, purpose and uses of snowball sampling. The response demonstrates some detail of a range of sociological material on snowball sampling with some focus on sociological concepts and/or theory; the material is generally accurate although lacks the depth of the band above. Candidates draw upon information from the source material and their wider knowledge. The quality of written communication will be very good presenting appropriate material in a logical, accurate and coherent manner, with few errors of grammar, punctuation and spelling.</p>

Question			Answer	Marks	Content	Guidance
						Levels of response
			<ul style="list-style-type: none"> To research groups like the deprived, the socially stigmatised and elites When the population is difficult to access or get permission to research When the population is rare and small To find experts in a particular field or a particular type of person relevant to the research that is not very common When the population is secretive, perhaps for legal or moral reasons To make the research more manageable/practical To reduce cost To reduce the time involved To ensure that the research is valid To ensure that the research is reliable To provide evidence to generalise to the wider population Other reasonable response. <p>An example of snowball sampling should be drawn from the source:</p> <ul style="list-style-type: none"> Snowball sample of 20 early retirees. <p>There are many examples of snowball samples that may be drawn from general background knowledge of social research. These might include:</p> <ul style="list-style-type: none"> Laurie Taylor 1984 Connell 1995 Whyte 1955 Patrick 1973 Sudman and Freeman 1988 		Data should be used from the source material for illustrative purposes and/or from other sociological sources, from material associated with this unit, as well as other units in the specification.	<p>Level 3 (5–6 marks) Candidates show a good knowledge and understanding of the nature, purpose and uses of snowball sampling. The response shows knowledge and understanding which is <i>either</i> ranging <i>or</i> detailed. There will be some understanding of concepts but not fully developed. Responses are generally clear and accurate, though may contain some errors. Candidates draw upon information from the source material and/or their wider knowledge. The quality of written communication will be good, presenting appropriate material in a logical, accurate and coherent manner, with few errors of grammar, punctuation and spelling.</p> <p>Level 2 (3–4 marks) Candidates show a basic knowledge and understanding of the nature, purpose and uses of snowball sampling. The response lacks width and detail, and may occasionally be unclear or inaccurate, and contain errors; however the candidate does establish the basic meaning of snowball sampling and at least one use in research. Knowledge and understanding of concepts may be partial, inaccurate and undeveloped, or omitted. Candidates may draw upon information from the source material and/or wider knowledge. The quality of written communication will be basic, presenting some sociological material and some errors of grammar, punctuation and spelling.</p>

Question			Answer	Marks	Content	Guidance
						Levels of response
			<p>AO2a: Interpretation and Application</p> <p>Candidates are expected to interpret and apply their knowledge and understanding of snowball sampling and methodology in general in their response to the question. This may also be related to the study of the context and aspect of social inequality under consideration; that of ageing within a youth subculture. A detailed understanding of this topic is not expected.</p>	5	<p>Candidates at the higher levels of response (L5 and L4) tend to refer back to the question/issue in a clear and explicit way.</p> <p>Most candidates will achieve a L3 and above if the material is generally relevant.</p>	<p>Level 1 (1–2 marks) Candidates show a limited knowledge and understanding of the nature, purpose and uses of snowball sampling. The response lacks width and detail and shows considerable inaccuracy and lack of clarity; the candidate may simply describe an aspect of sampling and/or research methods in general. Candidates may/may not draw upon information from the source material or wider knowledge. The quality of written communication will be limited, presenting some sociological material with limited coherence and frequent errors of grammar, punctuation and spelling.</p> <p>0 marks No relevant sociological knowledge or understanding of the nature, purpose and uses of sampling.</p> <p>AO2a: Interpretation and Application</p> <p>Level 5 (5 marks) Candidates show an excellent ability to interpret sociological knowledge and apply it to the uses of snowball sampling in sociological research. The material is explicitly and consistently related to the question.</p>

Question			Answer	Marks	Guidance	
					Content	Levels of response
					<p>Candidates who do not use the source material cannot achieve above L3.</p> <p>Candidates at L1 tend to talk about research methods in general with snowball sampling being implicit.</p>	<p>Level 4 (4 marks) Candidates show a very good ability to interpret sociological knowledge and apply it to the uses of snowball sampling in sociological research. The material is related to the question.</p> <p>Level 3 (3 marks) Candidates show a good ability to interpret sociological knowledge and apply it to the uses of snowball sampling in sociological research. The material is generally related to the question.</p> <p>Level 2 (2 marks) Candidates show a basic ability to interpret sociological knowledge and apply it to the uses of snowball sampling in sociological research. The material is related to the question occasionally and mainly implicitly.</p> <p>Level 1 (1 mark) Candidates show a limited ability to interpret sociological knowledge and apply it to the uses of snowball sampling in sociological research. The material is only implicitly related to the question and mainly irrelevant.</p> <p>0 marks No relevant sociological interpretation or application.</p>

Question			Answer	Marks	Content	Guidance
						Levels of response
2			<p>AO1: Knowledge and Understanding</p> <p>Candidates are expected to show knowledge and understanding of qualitative methods in research and related methodological issues.</p> <p>Qualitative methods within sociological research are generally regarded as the gathering of data and evidence that is in-depth, detailed and descriptive, rather than numerical or quantitative data in a statistical form. These methods usually focus on gathering information about the experience of social life from the point of view of the subjects/actors. They are interested in the meaning and subjective understanding of those being researched. The research is usually small scale and at a micro-level.</p> <p>Qualitative methods tend to be high in validity and low in reliability. They are favoured by interpretive and action theorists rather than positivist and structuralist approaches to research.</p> <p>Candidates should discuss the use of qualitative methods for this research problem – that of ageing in youth subcultures.</p>	5	<p>Candidates are likely to refer to methodological issues and concepts such as:</p> <ul style="list-style-type: none"> • interpretive • positivist • qualitative • quantitative • realist • feminist • action • meanings and experiences • empathy • rapport • reflexivity • subjectivity and objectivity • validity – accuracy/truthfulness/reality of data gathered • reliability – comparability of data gathered • representative • generalisable • replicable • ethical issues associated with qualitative methods • other relevant response 	<p>AO1: Knowledge and Understanding</p> <p>Level 5 (5 marks) Candidates show an excellent knowledge and understanding of the nature, purpose and uses of qualitative methods. The response demonstrates detail and accuracy of a wide range of sociological material with a strong focus on sociological theory and concepts. Candidates draw upon information from the source material and their wider knowledge. The quality of written communication will be excellent presenting appropriate material in a logical, accurate and coherent manner, with very few errors of grammar, punctuation and spelling.</p> <p>Level 4 (4 marks) Candidates show a very good knowledge and understanding of the nature, purpose and uses of qualitative methods. The response demonstrates some detail of a range of sociological material with some focus on sociological theory and concepts; the material is generally accurate although lacks the depth of the band above. Candidates draw upon information from the source material and their wider knowledge. The quality of written communication will be very good presenting appropriate material in a logical, accurate and coherent manner, with few errors of grammar, punctuation and spelling.</p>

Question			Answer	Marks	Guidance	
					Content	Levels of response
						<p>Level 3 (3 marks) Candidates show a good knowledge and understanding of the nature, purpose and uses of qualitative methods. The response shows knowledge and understanding which is <i>either</i> ranging <i>or</i> detailed. There will be some understanding of sociological concepts but not fully developed, and possibly some reference to theory. Responses are generally clear and accurate, though may contain some errors. Candidates draw upon information from the source material and/or their wider knowledge. The quality of written communication will be good, presenting appropriate material in a logical, accurate and coherent manner, with few errors of grammar, punctuation and spelling.</p> <p>Level 2 (2 marks) Candidates show a basic knowledge and understanding of the nature, purpose and uses of qualitative methods. The response lacks width and detail and may occasionally be unclear or inaccurate, and contain errors; however the candidate does establish the basic meaning of qualitative methods. Knowledge and understanding concepts may be partial, inaccurate and undeveloped, or omitted. Candidates may draw upon information from the source material and/or wider knowledge. The quality of written communication will be basic, presenting some sociological material and some errors of grammar, punctuation and spelling.</p>

Question			Answer	Marks	Guidance	
					Content	Levels of response
						<p>Level 1 (1 mark) Candidates show a limited knowledge and understanding of the nature, purpose and uses of qualitative methods. The response lacks width and detail, and shows considerable inaccuracy and lack of clarity; the candidate may simply describe an aspect of the method and/or research methods in general. Candidates may/may not draw upon information from the source material or wider knowledge. The quality of written communication will be limited, presenting some sociological material with limited coherence and frequent errors of grammar, punctuation and spelling.</p> <p>0 marks No relevant sociological knowledge or understanding of the nature, purpose and uses of qualitative methods.</p>

Question			Answer	Marks	Guidance	
					Content	Levels of response
			<p>AO2a: Interpretation and Application</p> <p>Candidates are expected to interpret and apply their knowledge and understanding of qualitative methods as a research method and methodology in general in their response to the question. Discussion of the concepts of validity, reliability, representativeness and generalisability in relation to qualitative methods for this research problem is also expected. This may also relate to the study of the context and aspect of inequality and difference under consideration; that of ageing in youth subcultures. A detailed understanding of this topic is not expected. The response may also relate the selection or choice of qualitative methods to the research aim.</p>	5	<p>In addition to those listed above for A01, candidates are likely to refer to methodological issues and concepts such as:</p> <ul style="list-style-type: none"> • access • target population • sampling • gaining understanding of meaning and purpose • seeing reality of social life • developing rapport • ethical issues • fitness for purpose • other relevant response <p>Candidates at the higher levels of response (L5 and L4) tend to refer back to the question/issue in a clear and explicit way.</p> <p>Most candidates will achieve a L3 and above if the material is generally relevant.</p> <p>Candidates who do not use the source material cannot achieve above L3.</p>	<p>AO2a: Interpretation and Application</p> <p>Level 5 (5 marks) Candidates show an excellent ability to interpret sociological knowledge and apply it to the uses of qualitative methods in sociological research. The material is explicitly and consistently related to the question.</p> <p>Level 4 (4 marks) Candidates show a very good ability to interpret sociological knowledge and apply it to the uses of qualitative methods in sociological research. The material is related to the question.</p> <p>Level 3 (3 marks) Candidates show a good ability to interpret sociological knowledge and apply it to the uses of qualitative methods in sociological research. The material is generally related to the question.</p> <p>Level 2 (2 marks) Candidates show a basic ability to interpret sociological knowledge and apply it to the uses of qualitative methods in sociological research. The material is related to the question occasionally and mainly implicitly.</p>

Question			Answer	Marks	Content	Guidance
						Levels of response
			<p>AO2b: Analysis and Evaluation</p> <p>Candidates should discuss the advantages and disadvantages of qualitative methods, especially in relation to the concepts of validity, reliability, representativeness and generalisability, and relate this to the context of the question, that of understanding the experience of ageing in youth subcultures.</p>	15	<p>Candidates at L1 tend to talk about research methods in general with qualitative methods being implicit.</p> <p>Candidates are likely to refer to methodological issues and concepts such as:</p> <ul style="list-style-type: none"> • the influence of researcher values on quality of data gathered and subsequent uses • objectivity • subjectivity • reflexivity • sample size effects • access to sample • representative • generalise • validity • reliability • respondent validation • desirable responses • researcher effects 	<p>Level 1 (1 mark) Candidates show a limited ability to interpret sociological knowledge and apply it to the uses of qualitative methods in sociological research. The material is only implicitly related to the question and mainly irrelevant.</p> <p>0 marks No relevant sociological interpretation or application.</p> <p>AO2b: Analysis and Evaluation</p> <p>Level 5 (13–15 marks) Candidates show an excellent ability to evaluate and analyse ie assess the view that qualitative methods provide the best way to understand ageing in youth subcultures. Sustained evaluative skills are demonstrated throughout and the response has an analytical and discursive tone. There will be a clear discussion of qualitative methods for the purpose of the research, and a clear attempt to draw a conclusion about the value of this method in this context. Responses should offer a critical review of sociological methodology drawing upon theoretical and conceptual arguments. At this level the discussion is likely to identify a wide range of issues/advantages/disadvantages in a balanced way. The discussion will be explicitly related to the research context in a clear and consistent way.</p>

Question			Answer	Marks	Guidance	
					Content	Levels of response
					<ul style="list-style-type: none"> • researcher imposition • subject and researcher biases • fitness for purpose • other relevant response <p>Ethical issues may be raised, for example of confidentiality, permission, access and the potential impact on the lives of those studied.</p>	<p>Level 4 (10–12 marks) Candidates show a very good ability to evaluate and analyse ie assess the view that qualitative methods provide the best way to understand ageing in youth subcultures. Responses will include a range of relevant evaluative arguments together with some precise points of evaluation of qualitative and/or other methodological approaches. There will be a discussion of qualitative methods for the purpose of the research, and an attempt to draw a conclusion about the value of this method in this context. The evaluation will be balanced, though lacking depth and/or detail at times. The discussion will be related to the research context.</p> <p>Level 3 (7–9 marks) Candidates show a good ability to evaluate and analyse ie assess the view that qualitative methods provide the best way to understand ageing in youth subcultures. Responses will raise a few clear points of evaluation but may leave these only partially developed. Different methodological approaches are likely to be compared briefly. The evaluation is not necessarily balanced. The discussion will be explicitly related to the research context occasionally.</p>

Question			Answer	Marks	Guidance	
					Content	Levels of response
						<p>Level 2 (4–6 marks) Candidates show a basic ability to evaluate and analyse ie assess the view that qualitative methods provide the best way to understand ageing in youth subcultures. Responses are likely to offer a few generalised, evaluative points with little supporting evidence or argument. If present, different methodological approaches are likely to be juxtaposed simply and implicitly. The discussion may not be related to the research context, or merely implied.</p> <p>Level 1 (1–3 marks) Candidates show a limited ability to evaluate and analyse ie assess the view that qualitative methods provide the best way to understand ageing in youth subcultures. Responses may include a one point of evaluation; however this is likely to be minimal, unbalanced, assertive or tangential to the main issue. Evaluation is implicit. The discussion may not be related to the research context.</p> <p>0 marks No relevant sociological evaluation or analysis.</p>

						Levels of response
			<p>AO2b: Analysis and Evaluation</p> <p>Candidates are expected to evaluate and assess sociological explanations of age inequality, presenting a range of strengths and/or weaknesses of these approaches to understanding age inequality. Likely arguments might include:</p> <ul style="list-style-type: none"> • some provide understanding of social class and its impact on age inequality and conflict • some explanations help to explain social change and others stability in age inequality • some recognise economic/gender/ethnic dimension to age inequality • some focus on structural aspects of age inequality, others on social action • some understand limits to social mobility and barriers to removal of age inequality • some under-emphasise status, power 	20		<p>occasionally and mainly implicitly.</p> <p>Level 1 (1 mark) Candidates show a limited ability to interpret sociological knowledge and apply it to sociological explanations of age inequality. The material is only implicitly related to the question and mainly irrelevant.</p> <p>0 marks No relevant sociological interpretation or application.</p> <p>AO2b: Analysis and Evaluation</p> <p>Level 5 (17–20 marks) Candidates show an excellent ability to evaluate and analyse ie assess sociological explanations of age inequality. Sustained evaluative skills are demonstrated throughout and the response has an analytical and discursive tone. Responses should offer a critical review of sociological explanations drawing upon theoretical and conceptual arguments. At this level the discussion is likely to identify a wide range of issues/advantages/disadvantages in a balanced way.</p> <p>Level 4 (13–16 marks) Candidates show a very good ability to evaluate and analyse ie assess sociological explanations of age inequality. Responses will include a range of relevant evaluative</p>

Question			Answer	Marks	Content	Guidance
						Levels of response
			<p>and political processes in age inequality – as compared to Weberian approaches</p> <ul style="list-style-type: none"> • some do not recognise consensual aspects of social life – as compared to functionalist approaches • some underestimate other aspects of inequality that are features of identity, culture and status – as compared to post modern approaches • some do not recognise patriarchal and feminist approaches to age inequality – as compared to feminist approaches • other relevant response <p>Comparison of alternative theoretical explanations is expected, for example Marxist, neo-Marxist, feminist, functionalist, post-modern and Weberian.</p>			<p>arguments. The evaluation will be balanced, though lacking depth and/or detail. The discussion will be related to the research context.</p> <p>Level 3 (9–12 marks) Candidates show a good ability to evaluate and analyse ie assess sociological explanations of age inequality. Responses will raise a few clear points of evaluation but may leave these only partially developed. Different theoretical approaches are likely to be compared briefly. The evaluation is not necessarily balanced. The discussion will be explicitly related to the research context occasionally.</p> <p>Level 2 (5–8 marks) Candidates show a basic ability to evaluate and analyse ie assess sociological explanations of age inequality. Responses are likely to offer a few generalised, evaluative points with little supporting evidence or argument. If present, different theoretical approaches are likely to be juxtaposed simply and implicitly.</p> <p>Level 1 (1–4 marks) Candidates show a limited ability to evaluate and analyse ie assess sociological explanations of age inequality. Evaluation is implicit and likely to be minimal, unbalanced, assertive or tangential to the main issue.</p> <p>0 marks No relevant sociological evaluation or analysis.</p>
