PRINCIPAL LEARNING LEVEL 3 ENGINEERING

F563/01 Mathematical Techniques and Applications for Engineers

Candidates answer on the Question Paper.

OCR supplied materials:

None

Other materials required:

Scientific calculator

Duration: 2 hours

Candidate forename				Candidate surname			
Centre number				Candidate nu	ımber		

INSTRUCTIONS TO CANDIDATES

- Write your name, centre number and candidate number in the boxes above. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer all the questions in Section A and any three questions from Section B.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Write your answer to each question in the space provided. Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).
- Do not write in the bar codes.

INFORMATION FOR CANDIDATES

- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is **60**.
- This document consists of 16 pages. Any blank pages are indicated.

SECTION A

Answer all questions.

1	Ren	Remove the brackets and simplify the expression $6x - (8x + 5)$.						
			[2]					
2	Fac	torise the expression $x^2 + 5x - 14$.						
			[2]					
3	Sim	plify the expression $[(x + 4)/8] - (x - 5)/2$.						
			[2]					
4	Solv	ve the equation $6(3x - 5) = 2(4x - 7)$.						
_			[2]					
5	(a)	Convert π/3 radians to degrees.	[1]					
	(b)	Convert 120° to radians.	[1]					

6 Name the wave form shown on the grid in Fig. 1 below.

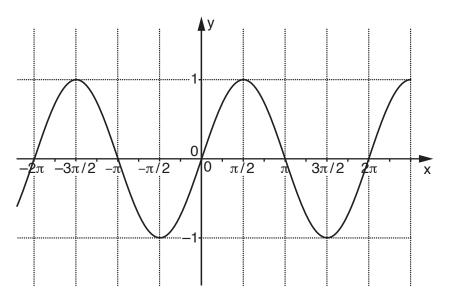

Fig. 1

7 In the triangle ABC, angle $A = 30^{\circ}$ and the length of side 'a' = 100 mm. Angle B is a right angle.

 	 •	
		[0]

8 In a right angled triangle the cosine of angle x is 3/5.

Draw the triangle and find the exact value of sine x.

9 Differentiate $y = 3 \cos x + 6x^3$ with respect to x.

.....[2

10	Differentiate $y = \sin x + (1/x)$ with respect to x.	
		[2]
11	Integrate 2 sin 5x with respect to x.	
12	Calculate the value of the definite integral $\int_{2}^{5} 4x^{3} dx$.	
		[3]
13	Explain, with the aid of a diagram, what is meant by the term 'skew' in a distribution curve.	
		[2]

14 Determine the mode and the median point for the set of ungrouped data given:

	6 9 7 11 8 10 6
	Mode =[1]
	Median =[1]
15	State the meaning of the parts of the following probability law listed:
	P(A or B) = P(A) + P(B) - P(A and B)
	P(A)
	[1]
	P(B)
	[1]
	[Total: 30]

SECTION B

Answer any **three** questions.

1	(a)	Given that $W = (mv^2)/2$.
		Calculate the value of W when $m = 5$ and $v = 10$.
		[1]
	(b)	Transpose the formula $A = B(1 + 2CD)$ to make C the subject.
		F01
	(c)	Transpose the formula $v^2 = u^2 + 2as$ to make u the subject.
		[2]
	(d)	Given that $A = B/(B + 2)$.
		Transpose the formula to make B the subject.
		[4]
		[Total: 10]

2	(a)	The area of a triangle is $1000\mathrm{mm^2}$ and its base is $40\mathrm{mm}$ long. Calculate its perpendicular height.
		[2]
	(b)	The length of the sides of triangle XYZ are $x = 8 \text{m}$, $y = 10 \text{m}$ and $z = 12 \text{m}$. Calculate the area of the triangle.
		[5]
	(c)	Calculate the area of a triangle ABC when angle $B=30^{\circ}$, side $a=12m$ and side $c=16m$.
		[3]
		[Total: 10]

(a)	A vehicle is moving in a straight line. The distance 's' metres moved in 't' seconds is given by $s = 60(20e^{-t/20} + t - 20)$.
	Determine the acceleration of the vehicle after 10 seconds.
	[4]
(b)	The surface area 'S' of a particular cylindrical water tank is given by S = 2 π r ² + 400/r where r is the radius.
	Calculate the radius of the tank that will give the minimum surface area.
	[6]

[Total: 10]

3

- 4 (a) The time taken, in minutes, to carry out 50 engineering processes in a workshop was recorded.
 - (i) Complete the cumulative frequency column in the table below.

Time (minutes)	Tally	Cumulative frequency
0 < t ≤ 20	8	
20 < t ≤ 40	18	
40 < t ≤ 60	15	
60 < t ≤ 80	5	
80 < t ≤ 100	3	
100 < t ≤ 120	1	

[1]

(ii) Use the grid in Fig. 2 to draw a cumulative frequency diagram for this data.

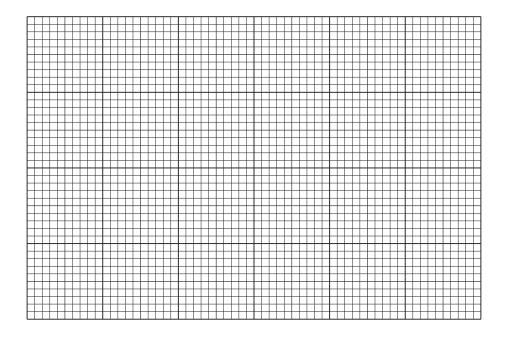

Fig. 2

[3]

(iii) Use your cumulative frequency diagram to find an estimate for the median number of minutes taken to carry out the workshop processes.

.....[1]

(iv) Use your cumulative frequency diagram to find the 60th percentile.

.....[1]

(b) Using the table provided, determine the mean and the standard deviation of:

27, 35, 23, 40 and 35.

x	x ²
27	
35	
23	
40	
35	
$\Sigma x =$	$\sum x^2 =$

Mean =	[1]
Standard deviation =	
	[3]

[Total: 10]

(a)	(i)	Velocity v is given by the formula $v = u + at$.
		Determine the values of u and a if $v = 60$ when $t = 10$ and $v = 30$ when $t = 4$.
		[6]
	(ii)	Calculate the velocity v when t = 6.
(b)	Salv	e the quadratic equation $3x^2 + 14x + 8 = 0$.
(D)	SOIV	e the quadratic equation 3x + 14x + 6 = 0.
		[3]
		(ii)

6	(a)	In a triangle ABC, $AB = 5 \text{m}$, $AC = 8 \text{m}$ and angle $ABC = 42^{\circ}$. Calculate the angle ACB.	
			[4]
	(b)	In another triangle ABC, side $a=40\text{mm}$, side $b=70\text{mm}$ and angle $C=50^\circ$. Calculate the length of side c.	
	(c)	Show that $\sin 30^\circ + \cos 60^\circ + \tan 45^\circ = 2$.	[4]
			[2]
			al: 10]

(a)	Integrate $\cos 2x + 1/x^2 + \sqrt{x}$ with respect to x.
	[5]
(b)	The distance, d metres, travelled by a vehicle in a time interval between t_1 seconds and t_2 seconds is given by:
	$d = \int\limits_{t_1}^{t_2} v(t) dt \text{ where } v(t) \text{ ms}^{-1} \text{ is the vehicle's speed at time t seconds.}$
	If $v(t) = 4 + 6t$, calculate the distance travelled by the vehicle 5 seconds after it starts from the rest.
	[01
(-)	The force 5 resistance action on a mass of distance a mature from a fixed point is given by
(c)	The force F newtons acting on a mass at distance s metres from a fixed point is given by $F = 8s - s^2$.
	Calculate the work done when the mass is moved from distance \mathbf{s}_1 2 metres to a distance \mathbf{s}_2 of 6 metres given that:
	work done = $\int_{s_1}^{s_2} F ds$.
	[2]
	[Total: 10]
