CASE STUDY

Duration: 1 hour 30 minutes

INFORMATION FOR CANDIDATES

- This is a clean copy of the Case Study which you should already have seen.
- You should refer to it when answering the examination questions which are printed in a separate booklet.
- You may **not** take your previous copy of the Case Study into the examination.
- You may **not** take notes into the examination.
- This document consists of **4** pages. Any blank pages are indicated.

INSTRUCTION TO EXAMS OFFICER/INVIGILATOR

- Do not send this Case Study for marking; it should be retained in the centre or recycled. Please contact OCR Copyright should you wish to re-use this document.

TEXT 1

Single Mother Britain

Britain has more single mothers than any other major country in Europe ... One in 15 homes in this country is headed by lone women with children, with only tiny Estonia having a higher percentage of households composed of single women with children.

TEXT 2

This report presents statistics on abortions carried out in England and Wales in 2010.

The total number of abortions was 189,574, 0.3% more than in 2009 (189,100) and 8.0% more than in 2000 (175,542).

The age-standardised abortion rate was 17.5 per 1,000 resident women aged 15–44, the same as in 2009, but 3% higher than in 2000 (17.0) and more than double the rate of 8.0 recorded in 1970.

The abortion rate was highest at 33 per 1,000 for women aged 19 and 20, the same as in 2009 and slightly lower than the highest rates in the year 2000 (34 per 1,000 for both 19 and 20 year olds).

The under-16 abortion rate was 3.9 per 1,000 women and the under-18 rate was 16.5 per 1,000 women, both lower than in 2009 (4.0 and 17.6 per 1,000 women respectively) and in the year 2000 (3.9 and 18.3 per 1,000 women respectively).

TEXT 3

The death rate in Britain has reached the lowest level on record, as most people now live into their eighties.

The mortality rate for men has fallen by almost a half over the past three decades according to The Office for National Statistics (ONS), and by more than a third for women. The drop is down to better medical care and healthier lifestyles, which has particularly affected the death rate as a result of heart disease.

TEXT 4

Older mothers and immigrants have been behind the biggest baby boom for almost 40 years, official statistics show...

Foreign-born mothers accounted for 25.1 per cent of births, up from 15.5 per cent in 2000...

Source: Martin Beckford, *The Daily Telegraph*, 14/07/2011, data taken from *Births and Deaths in England and Wales, 2010* Bulletin, ONS

TEXT 5

More than 450,000 extra children will be starting primary school within the next four years, government figures show...

... some areas will see the number of pupils aged five and six rise by 10 per cent.

An emergency £500 million was released last summer to help local authorities provide extra school places.
