Graph for Question 6

carbon dioxide
concentration
in parts per million

Comments for Question 6(b)

Alice says “There is a positive correlation between temperature and carbon dioxide concentration.”

Ben says “Burning fossil fuels increases the carbon dioxide concentration.”

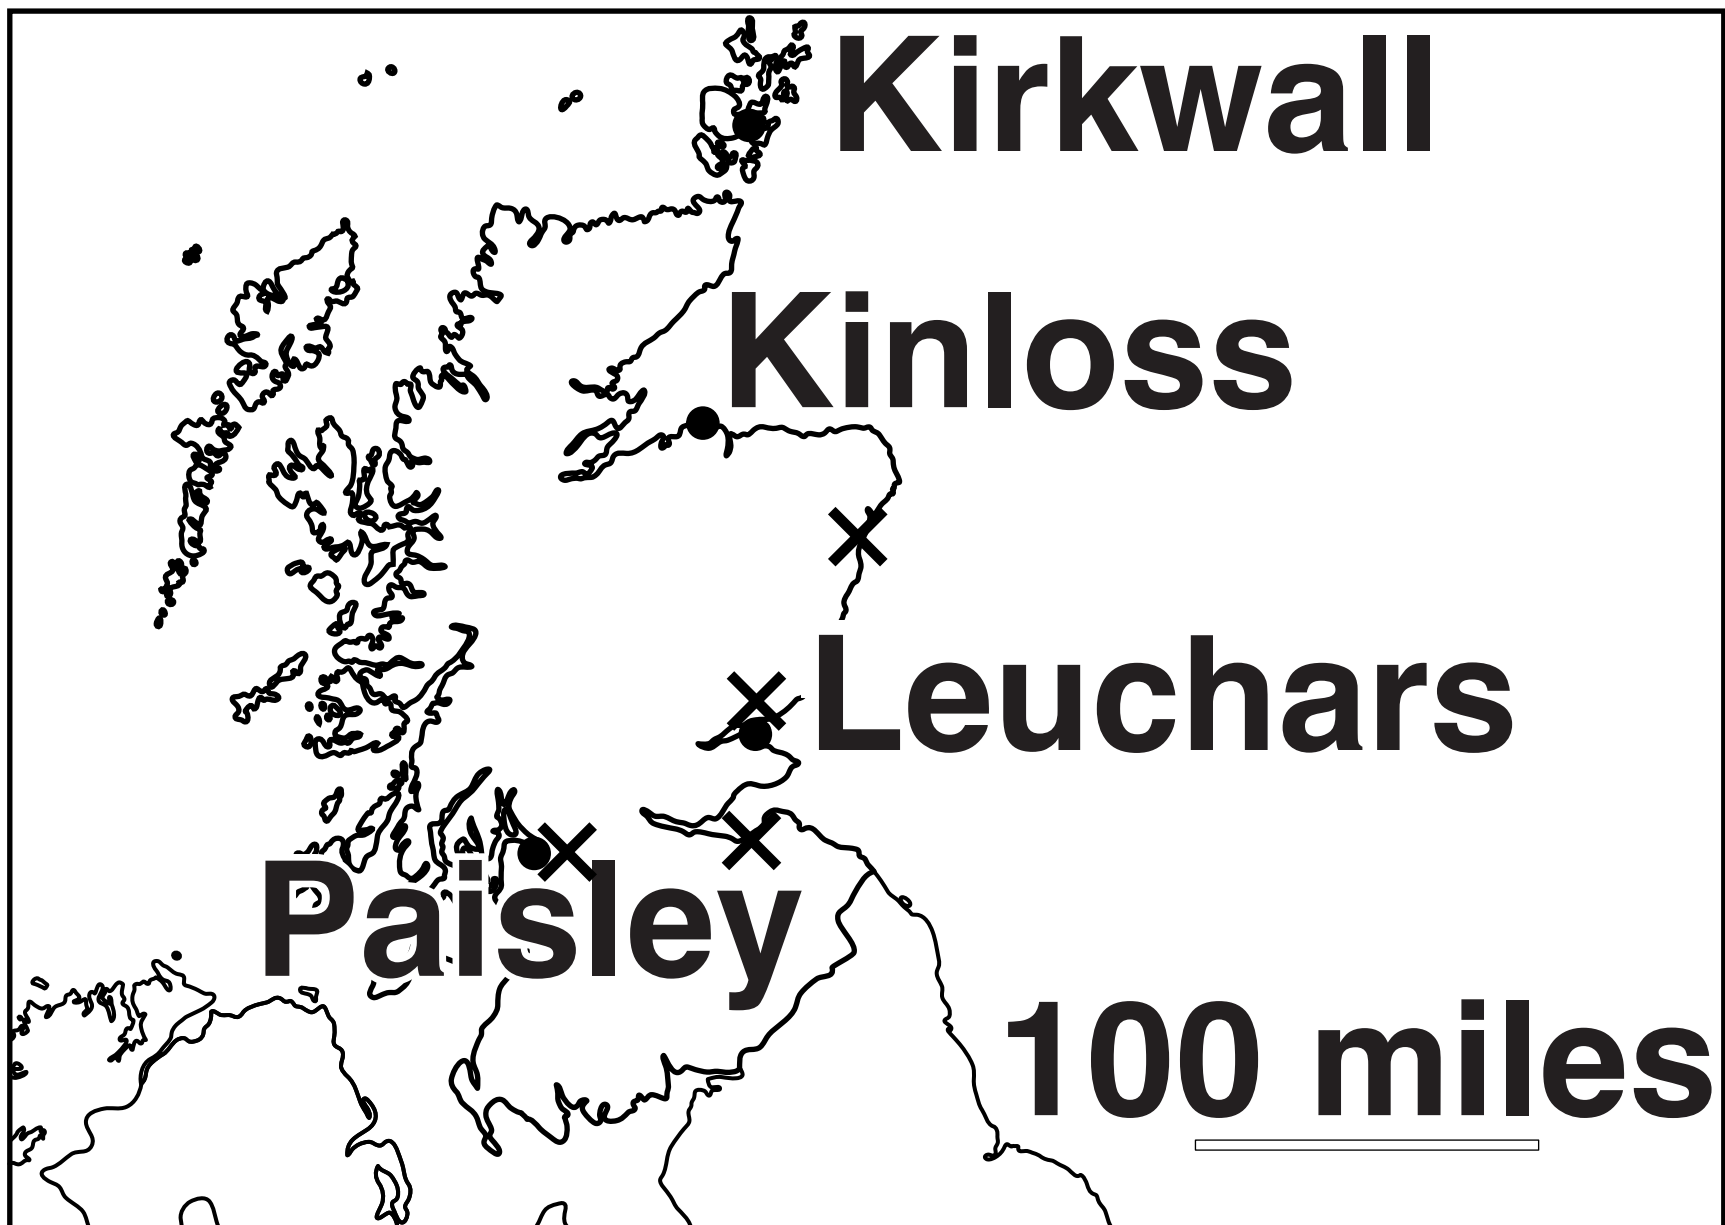

Chandra says “Carbon dioxide concentration didn’t change much until after 1900.”

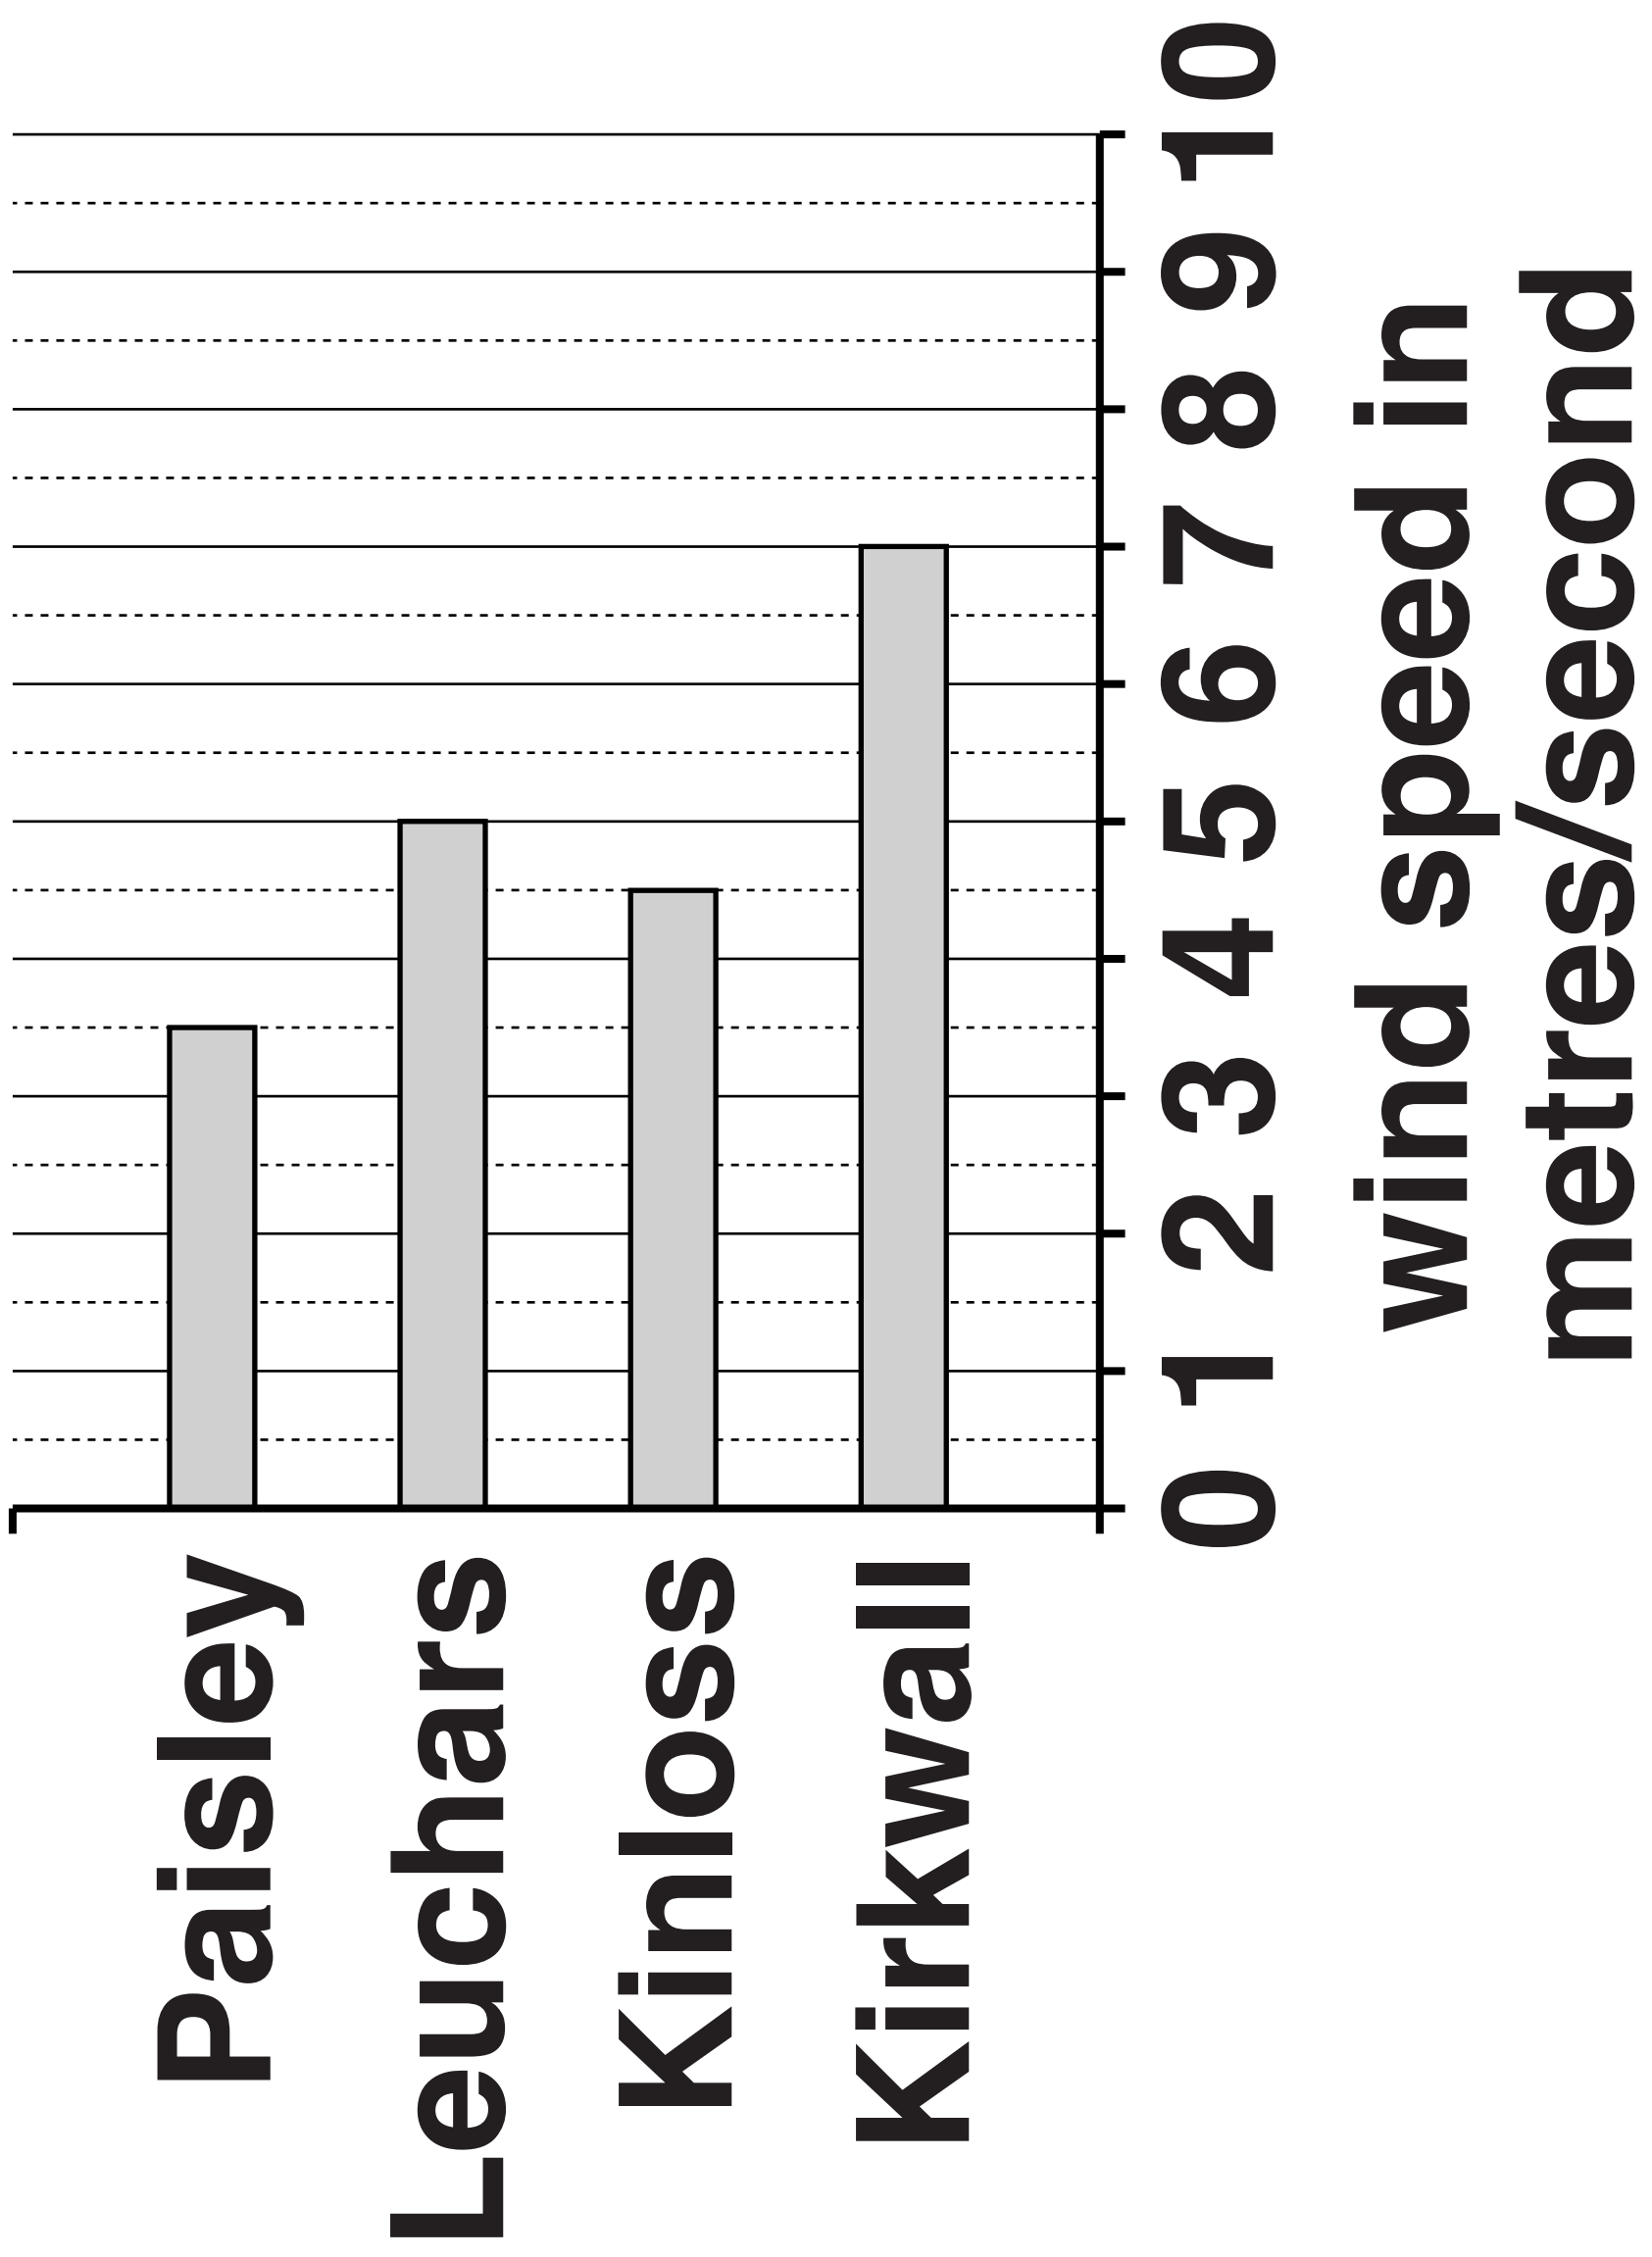

Debra says “I’m worried about the effects of global warming on the environment.”

Eddie says “Carbon dioxide is a greenhouse gas. It makes the Earth absorb more of the Sun’s radiation.”

Copyright Information

OCR is committed to seeking permission to reproduce all third-party content that it uses in its assessment materials. OCR has attempted to identify and contact all copyright holders whose work is used in this paper. To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced in the OCR Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download from our public website (www.ocr.org.uk) after the live examination series.

If OCR has unwittingly failed to correctly acknowledge or clear any third-party content in this assessment material, OCR will be happy to correct its mistake at the earliest possible opportunity.

For queries or further information please contact the Copyright Team, First Floor, 9 Hills Road, Cambridge CB2 1GE.
