11–15 January 2016

PRINCIPAL LEARNING LEVEL 2 ENGINEERING

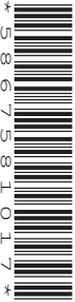

F548/01 The Engineered World

OCR supplied materials:

- Insert and Workplace scenario (inserted) (F548/01/I)

Other materials required:

- Digital recorder

Candidate forename		Candidate surname	
--------------------	--	-------------------	--

Centre number						Candidate number				
---------------	--	--	--	--	--	------------------	--	--	--	--

INSTRUCTIONS TO CANDIDATES

- The Insert and Workplace Scenario will be found inside this document.
- Write your name, centre number and candidate number in the boxes above. Please write clearly and in capital letters.

INFORMATION FOR CANDIDATES

- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is **60**.
- This document consists of **4** pages. Any blank pages are indicated.

The viva-voce should be conducted in a quiet location where there will be no interruptions and the learner has no distractions, external contacts or access to unauthorised materials.

The centre is required to provide a digital recorder that can store up to 15 minutes of video of the viva-voce. The profiles of the learner and presenter should be clearly visible on camera. An independent invigilator must also be present.

Additionally the presenter has the opportunity to record, using **brief** notes if necessary, the key points raised by the learner, using the pages provided in this booklet.

- Before the viva-voce starts the learner should be asked to complete the front cover of this booklet.
- The presenter should check that the learner has their personal work book compiled for this unit.
- The presenter should check with the learner which engineer, engineering achievement and sectors they are going to talk about.

Before recording the viva-voce the presenter should:

1. Ask the learner to be seated.
2. Explain the format of the viva-voce to the learner by reading to them the following information:
 - Your viva-voce will last for 15 minutes.
 - Firstly I will ask you to state your name, centre number and candidate number as soon as we start.
 - I will be asking you six questions, which you must try to answer.
 - You will be talking about some aspects of the research you have undertaken.
 - You may refer to your personal workbook if you feel it would help.
 - You must remember to speak clearly and confidently.
 - While you are speaking I might be making brief notes of what you say in this booklet.
3. Ask the learner if they are ready to begin.

The presenter will then say:

“You have a maximum of 15 minutes to answer the questions. After 15 minutes you will have to stop and the recording will finish. I will let you know when there are 2 minutes left.”

The camera will now be switched on and an indication will be given to the learner and presenter that the viva-voce has started.

The presenter will then say:

“Please tell me your name, centre number and candidate number and please remember to speak clearly.”

“Thank you, your 15 minutes starts now.”

3

- 1** “Name an engineer that you are familiar with and then tell me about the engineering achievement that made them well-known.”

[Total: 10]

- 2** “Please tell me about the products and services that are provided by the automotive engineering sector.”

[Total: 10]

- 3** “Explain what is meant by the term ‘technician’ and then describe the job role of a technician in an engineering sector.”

[Total: 10]

- 4** “Please tell me how engineers can conserve non-renewable resources.”

[Total: 10]

- 5** “Please name **three** engineering materials that can be recycled and then explain how new products can be made from recycled materials.”

[Total: 10]

6 “Now I am going to give you a workplace scenario”.

(The presenter gives the learner a printed copy of the workplace scenario and also reads the scenario out).

Alex, aged 35, has started work in an engineering workshop as an experienced machinist. The supervisor tells him he will be operating different types of machinery. Alex will also be responsible for a trainee.

“Now I am going to ask you a question about the workplace scenario.”

“What can you tell Alex about his own responsibilities as a machinist and his responsibilities when looking after a trainee?”

[Total: 10]

.....
If there is time after all of the questions have been answered the presenter may repeat any questions and give the learner the opportunity to add to their earlier answers.

When the learner indicates they have finished all questions and the learner has finished speaking, the presenter then says:

“The viva-voce is over and the camera will now be switched off”.

At no time should the centre staff enter into any discussion about learner performance.

Copyright Information

OCR is committed to seeking permission to reproduce all third-party content that it uses in its assessment materials. OCR has attempted to identify and contact all copyright holders whose work is used in this paper. To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced in the OCR Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download from our public website (www.ocr.org.uk) after the live examination series.

If OCR has unwittingly failed to correctly acknowledge or clear any third-party content in this assessment material, OCR will be happy to correct its mistake at the earliest possible opportunity.
