INTRODUCTION

This document lists the current Cambridge Technicals Units and Learning Outcomes (LO) and maps them to the new Cambridge Technicals Units and Learning Outcomes so that you can see where each learning outcome has remained, changed, moved or been removed.

We've also identified where the 2012 BTEC units map to the Cambridge Technicals 2016 units.

IT

The Cambridge Technicals in IT have been developed to meet the changing needs of the sector, and prepare your students for the challenges they'll face in Further Education or employment. Designed in collaboration with experts spanning the breadth of the sector, the Cambridge Technicals in IT focuses on the skills, knowledge and understanding that today's universities and employers demand. Your students will practically apply their skills and knowledge in preparation for further study or the workplace.

The Award qualification provides an introduction to the IT sector and students will use the Award as a stepping stone into employment or further study.

When developing the Certificate qualification we worked with organisations within the IT care sector to design the content and assessment of this qualification – ensuring that your learners are prepared and have the skills to progress to Further Education or employment.

The Diploma qualification has three vocational pathways that can be followed (at least one pathway must be achieved). Each pathway focuses on industry sectors and job roles that your learners will actually be able to do having completed a Cambridge Technical. We've worked in partnership with industry to make sure your learners can progress directly into the sector in job roles that are appropriate for their age and experience.

TEACHING AND LEARNING RESOURCES

New resources are being developed to support your teaching of this new qualification. These will include Pathway Delivery Guides, a Qualifications Calculator and a Progress Tracker.

2016 Level 2 Cambridge Technicals Suite

- **New suite for first teaching September 2017**
- **Externally assessed content**
- **Student focused internal assessment rules**
- **Eligible for Key Stage 5 performance points from 2019**
- **OCR visiting moderation providing centre feedback and support**
- **Designed to meet the DfE technical guidance**
