

## **GCSE**

### **Physics A**

Unit **A182/01**: Unit 2 – Modules P4, P5, P6 (Foundation Tier)

General Certificate of Secondary Education

### **Mark Scheme for June 2016**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

## Annotations

Used in the detailed Mark Scheme:

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
(1)	separates marking points
not/reject	answers which are not worthy of credit
ignore	statements which are irrelevant - applies to neutral answers
allow/accept	answers that can be accepted
(words)	words which are not essential to gain credit
<u>words</u>	underlined words must be present in answer to score a mark
ecf	error carried forward
AW/owtte	credit alternative wording / or words to that effect
ORA	or reverse argument

Available in RM Assessor to annotate scripts:

	indicate uncertainty or ambiguity
	benefit of doubt
	contradiction
	incorrect response
	error carried forward
	draw attention to particular part of candidate's response
	no benefit of doubt
	reject
	correct response

	draw attention to particular part of candidate's response
	information omitted
	indicate uncertainty or ambiguity
	benefit of doubt
	contradiction
	incorrect response
	error carried forward
	draw attention to particular part of candidate's response
	draw attention to particular part of candidate's response
	draw attention to particular part of candidate's response
	no benefit of doubt
	reject
	correct response
	draw attention to particular part of candidate's response
	information omitted

**Subject-specific Marking Instructions**

- a. Accept any clear, unambiguous response (including mis-spellings of scientific terms if they are *phonetically* correct, but always check the guidance column for exclusions).
- b. Crossed out answers should be considered only if no other response has been made. When marking crossed out responses, accept correct answers which are clear and unambiguous.

*e.g. for a one-mark question where ticks in the third and fourth boxes are required for the mark:*

<del>✗</del>
<del>✗</del>

*This would be worth  
1 mark.*

✓
<del>✗</del>

*This would be worth  
0 marks.*

<del>✗</del>
<del>✗</del>
✓
✓

*This would be worth  
1 mark.*

- c. The list principle:  
If a list of responses greater than the number requested is given, work through the list from the beginning. Award one mark for each correct response, ignore any neutral response, and deduct one mark for any incorrect response, e.g. one which has an error of science. If the number of incorrect responses is equal to or greater than the number of correct responses, no marks are awarded. A neutral response is correct but irrelevant to the question.

d. Marking method for tick-box questions:

If there is a set of boxes, some of which should be ticked and others left empty, then judge the entire set of boxes.

If there is at least one tick, ignore crosses and other markings. If there are no ticks, accept clear, unambiguous indications, e.g. shading or crosses. Credit should be given according to the instructions given in the guidance column for the question. If more boxes are ticked than there are correct answers, then deduct one mark for each additional tick. Candidates cannot score less than zero marks.

e.g. if a question requires candidates to identify cities in England:

Edinburgh	<input type="checkbox"/>
Manchester	<input type="checkbox"/>
Paris	<input type="checkbox"/>
Southampton	<input type="checkbox"/>

the second and fourth boxes should have ticks (or other clear indication of choice) and the first and third should be blank (or have indication of choice crossed out).

Edinburgh			✓			✓	✓	✓	✓	
Manchester	✓	x	✓	✓	✓				✓	
Paris				✓	✓		✓	✓	✓	
Southampton	✓	x		✓		✓	✓		✓	
<b>Score:</b>	<b>2</b>	<b>2</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>NR</b>

e. For answers marked by levels of response:

- i. **Read through the whole answer from start to finish**
- ii. **Decide the level that best fits** the answer – match the quality of the answer to the closest level descriptor
- iii. **To determine the mark within the level**, consider the following:

Descriptor	Award mark
A good match to the level descriptor	The higher mark in the level
Just matches the level descriptor	The lower mark in the level

- iv. Use the **L1**, **L2**, **L3** annotations in RM Assessor to show your decision; do not use ticks.

Quality of Written Communication skills assessed in 6-mark extended writing questions include:

- appropriate use of correct scientific terms
- spelling, punctuation and grammar
- developing a structured, persuasive argument
- selecting and using evidence to support an argument
- considering different sides of a debate in a balanced way
- logical sequence

Question		Answer	Marks	
1	(a)	Electrons move from the cloth on to the rod. <input checked="" type="checkbox"/> Electrons move from the rod on to the cloth. <input type="checkbox"/> Molecules move from the cloth on to the rod. <input type="checkbox"/> Molecules move from the rod on to the cloth. <input type="checkbox"/>	1	
	(b) (i)		1	Must only be <b>ONE</b> line to gain mark
	(ii)	Beth is wrong (no marks) charge does not leak away / charges do not move (1); rod is an insulator / not a conductor (1)	2	
<b>Total</b>			<b>4</b>	

Question		Answer	Marks	Guidance
2	(a)	arrow vertical	1	either up or down but not on the wire (showing current)
	(b)	reverse current / reverse battery/cells / reverse poles	1	<b>allow</b> turn the magnet the other way up turn magnet around/ turn battery around <b>Reject</b> – change the magnet
	(c)	Motor	1	
<b>Total</b>			<b>3</b>	

Question		Answer	Marks	Guidance
3	(a)	(i) spiral (2 <sup>nd</sup> answer)	1	
		(ii) fluorescent (1 <sup>st</sup> answer)	1	
		(iii) two (2nd answer)	1	
	(b)	(i) ammeter symbol ringed	1	
		(ii) use of equation $R=V/I$ (1); two values of R calculated (1); resistance increases (as current increases) (1)	3	10 and 15 gains the first two marks
		(iii) repeat readings / more data	1	
<b>Total</b>			<b>8</b>	

Question	Answer	Marks	Guidance
4	<p><b>[Level 3]</b> States and explains the correlation <b>AND</b> describes at least two improvements. Quality of written communication does not impede communication of the science at this level. (5 – 6 marks)</p> <p><b>[Level 2]</b> States the correlation <b>AND</b> describes two improvements. Quality of written communication partly impedes communication of the science at this level. (3 – 4 marks)</p> <p><b>[Level 1]</b> States the correlation <b>OR</b> describes two improvements. Quality of written communication impedes communication of the science at this level. (1 – 2 marks)</p> <p><b>[Level 0]</b> Insufficient or irrelevant science. Answer not worthy of credit. (0 marks)</p>	6	<p><b>This question is targeted at grade D/C</b></p> <p><b>Indicative scientific points may include:</b></p> <p><b>Correlation:</b> <b>Statement of correlation</b></p> <ul style="list-style-type: none"> <li>• resistance decreases with more wires/paths/branches</li> <li>• negative correlation</li> </ul> <p><b>Explanation of correlation</b></p> <ul style="list-style-type: none"> <li>• more wires gives more paths for current/electrons/charge</li> <li>• greater cross sectional area</li> <li>• easier for current/electrons/charge to get through</li> <li>• Use of <math>V=IR</math></li> </ul> <p><b>Improvements:</b></p> <ul style="list-style-type: none"> <li>• more wires / longer wires / thicker wires / other wire types</li> <li>• repeat readings</li> <li>• find mean/average reading</li> <li>• control variables (use same meter, leads, temperature)</li> <li>• connect meter to known resistor</li> <li>• description of other suitable correct method</li> <li>• someone else could reproduce the experiment</li> </ul> <p><b>Use the L1, L2, L3 annotations in RM ASSESSOR ; do not use ticks.</b></p>
	<b>Total</b>	6	

Question		Answer	Marks	Guidance
5	(a)	B (1); activity halves in 1 hour owtte (1)	2	1000 halves or gets to 500 (in one hour) <b>Not accept</b> half life is 1 hour
	(b)	Any three from: activity decreases with time/short half life;  most gamma exit body; the benefit outweighs risk; leads to a diagnosis; leads to a cure.	3	<b>Allow</b> radiation/gamma rays get weaker / not as strong /less intense / fewer gamma rays  <b>Allow</b> Dr is an expert / should be trusted <b>Allow</b> chances of harm are low <b>Reject</b> gamma /radiation does not cause cancer
		<b>Total</b>	<b>5</b>	

Question		Answer	Marks	Guidance
6	(a)	burning <input type="checkbox"/> changes in the nucleus <input checked="" type="checkbox"/> chemical reaction <input type="checkbox"/> ionisation <input type="checkbox"/>	1	
	(b) (i)	any <b>THREE</b> from: water cools waste water shields waste / absorbs radiation sealed to prevent contamination e.g. of water supply prevent leakage waste has high activity waste has long half-life keep waste away from people once waste is cool enough to handle safely	3	
	(ii)	lower activity /low level waste has a lower risk	1	<b>accept</b> - less dangerous than high level ora not as radioactive / not as harmful <b>not accept</b> Not dangerous
	(c)	any <b>THREE</b> from: risks of accident very small ; lots of other things he does carry a greater risk ; very little radiation escapes from power station / radiation is contained; monitoring (of radiation levels) around station; safety features (such as shielding / control rods/highly skilled staff); there is background radiation all around us;	3	<b>accept</b> lots of security / waste is safely stored away.
<b>Total</b>			<b>8</b>	

Question	Answer	Marks	Guidance
7	<p><b>[Level 3]</b> Gives reason for precautions <b>AND</b> states a feature of alpha <b>AND</b> states a feature of beta. Quality of written communication does not impede communication of the science at this level. (5 – 6 marks)</p> <p><b>[Level 2]</b> Gives two from: reason for precautions <b>OR</b> states a feature of alpha <b>OR</b> states a feature of beta. Quality of written communication partly impedes communication of the science at this level. (3 – 4 marks)</p> <p><b>[Level 1]</b> Gives one from: reason for precautions <b>OR</b> states a feature of alpha <b>OR</b> states a feature of beta.  Quality of written communication impedes communication of the science at this level. (1 – 2 marks)</p> <p><b>[Level 0]</b> Insufficient or irrelevant science. Answer not worthy of credit. (0 marks)</p>	6	<p>This question is targeted at grades up to E</p> <p><b>Indicative scientific points may include:</b></p> <p><b>Need for precautions:</b></p> <ul style="list-style-type: none"> <li>• radiation is ionising</li> <li>• damage living cells/ mutate</li> <li>• avoids contamination</li> <li>• kill living cells</li> <li>• cause cancer</li> <li>• break molecules into bits (ions)</li> <li>• <math>\beta</math> can get through skin and get to internal organs</li> <li>• makes you ill / harmful (partial credit)</li> </ul> <p><b>Reasons for difference:</b></p> <p><b>Alpha</b></p> <ul style="list-style-type: none"> <li>• <math>\alpha</math> stopped by a few cm of air</li> <li>• <math>\alpha</math> stopped by thin sheet of paper / outer layer of skin</li> <li>• <math>\alpha</math> cannot get to internal organs</li> </ul> <p><b>Beta</b></p> <ul style="list-style-type: none"> <li>• <math>\beta</math> can travel about 1m through air</li> <li>• <math>\beta</math> stopped by thin sheet of aluminium</li> <li>• <math>\beta</math> can penetrate skin</li> </ul> <p>• <math>\beta</math> travels further than <math>\alpha</math> comparative - so both types of radiation mentioned but only partial credit.</p> <p><b>Ignore</b> references to gamma and X-rays</p> <p><b>Use the L1, L2, L3 annotations in RM ASSESSOR ; do not use ticks.</b></p>
	<b>Total</b>	6	

Question		Answer	Marks	Guidance
8	(a)		2	One mark for each correct line
	(b)	(i) 18 (m/s)	1	
		(ii) S (4 <sup>th</sup> answer)	1	
	(c)	(i)	2	One mark for each correct line
		(ii) equal / same (length/magnitude) (1); opposite direction (1)	2	<b>accept</b> one forward and one backwards <b>accept</b> “balance” for one mark <b>reject</b> right and left
<b>Total</b>			<b>8</b>	

Question	Answer	Marks	Guidance
9	<p><b>[Level 3]</b> More than one relevant statement made <b>AND</b> explanation given. Quality of written communication does not impede communication of the science at this level. (5 – 6 marks)</p> <p><b>[Level 2]</b> Both relevant statements made <b>OR</b> an explanation given. Quality of written communication partly impedes communication of the science at this level. (3 – 4 marks)</p> <p><b>[Level 1]</b> One relevant statement made. Quality of written communication impedes communication of the science at this level. (1 – 2 marks)</p> <p><b>[Level 0]</b> Insufficient or irrelevant science. Answer not worthy of credit. (0 marks)</p>	6	<p>This question is targeted at grades up to D/C</p> <p><b>Indicative scientific points may include:</b></p> <p><b>Statements:</b></p> <ul style="list-style-type: none"> <li>• Scrunched up newspaper compresses / works like a crumple zone (or other example)</li> <li>• To reduce / absorb the force/shock/ energy</li> </ul> <p><b>Explanation:</b></p> <ul style="list-style-type: none"> <li>• Time taken to stop increases Distance to stop becomes longer</li> <li>• Slower momentum change due to deceleration</li> <li>• Loss of kinetic energy</li> </ul> <ul style="list-style-type: none"> <li>• Use of change of momentum=resultant force x time</li> <li>• Use of work done=force x distance</li> </ul> <p><b>Use the L1, L2, L3 annotations in RM ASSESSOR ; do not use ticks.</b></p>
	<b>Total</b>	6	

Question			Answer	Marks	Guidance
10	(a)	(i)	22 (N)	1	
		(ii)	11 (1) J (1)	2	<b>allow:</b> ECF from ai <b>allow:</b> j / Nm / joule <b>do not allow:</b> n (for N)/ mN
		(iii)	Total energy stays the same / energy is not lost (or gained) (1);  (work done by Roy =) heat (wasted) <b>and</b> GPE/energy gained by tins (1)	2	<b>allow:</b> energy cannot be created or destroyed <b>allow:</b> energy is <b>only</b> transferred (into other forms) <b>Reject</b> Similar  <b>ignore</b> sound / KE of Roy
	(b)		D (4th answer)	1
