

OCR Nationals in ICT Level 2 - Unit 3 - Digital imaging for the printed media – Change Matrix

Changes have been made to the unit in response to feedback from centres, the introduction of new and emerging technology and to address regulatory requirements. In making these changes we have clarified and updated the assessment requirements, enhanced the Knowledge, Understanding and Skills (KUS) and improved the guidance for centres.

To assist centres the new units, for Level 2 Nationals in ICT 2010, have the key changes highlighted in yellow. The changes for this unit are detailed in the table below.

AO	Section	Change	Rationale
AO1	Assessment Objective	Removed 'bitmap and vector'.	Updates terminology.
	Grading grid	Revised so that all candidates collect and display at least four graphics from at least two different sources. Removed the Distinction requirement to identify the message. Revised the Distinction - requirement to discuss why the graphic is effective or not.	Removed numbers as differentiators in the grading grid where they did not provide candidates opportunities to demonstrate breadth and depth of understanding and skills.
	Guidance	Removed the text about only needing one graphic from each source - this is now in the grading grid.	
AO3	KUS and guidance	Separated clip art from other web graphics, to create four categories.	Increases clarity and resolves a known issue that has been documented in common issues and FAQs.
