THE ADVERTISING GAME

If a TV advert is loud, colourful or shocking, it is likely to get the audience's attention. However, it is more difficult to get the audience to actually remember an advert and to recall the details of its product. Too much information will overload the audience. It is better to break information down into chunks and repeat the message a number of times. The purpose is to get a potential customer to store an advert into their long-term memory. However, even when it is there, it may need a cue to be retrieved. This is why product displays are important in shops.

Using the source:

- (a) Identify the purpose of advertising.

DEPRIVATION OR PRIVATION?

Child X was 4 years old when he was taken into care. He had always lived with his mother up until this point. His mother, a single parent, said she could no longer cope with him. She ended up abandoning him by leaving him with neighbours for four weeks. The neighbours finally contacted social services when they realised that the mother was not coming back. The child is now displaying lots of behaviour problems.

Using the source:

- (a) Explain how a psychologist could decide whether Child X has suffered privation rather than deprivation.**

[3]

[3]

(b) Outline ONE other application of research into attachment.
