**Foundations of Advanced Mathematics (MEI)**

Unit **6989**: Multiple Choice

Free Standing Mathematics Qualification

**OCR Report to Centres January 2014**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This report on the examination provides information on the performance of candidates which it is hoped will be useful to teachers in their preparation of candidates for future examinations. It is intended to be constructive and informative and to promote better understanding of the specification content, of the operation of the scheme of assessment and of the application of assessment criteria.

Reports should be read in conjunction with the published question papers and mark schemes for the examination.

OCR will not enter into any discussion or correspondence in connection with this report.

## Foundations of Advanced Mathematics – 6989

There were just fewer than 500 entries for this series. The mean mark was 28. The minimum mark scored by two candidates was 7 and three candidates scored the maximum mark of 40. In 22 questions at least one candidate offered no answer and in some cases there were quite a number of such omissions – the maximum number was 6 for question 34. These were scattered throughout the paper (and did not include questions 39 and 40) so this did not provide any evidence that candidates found the paper too long.

In all questions each of the distracting responses was selected by at least one candidate.

In 5 questions the correct response was chosen by fewer than 50% of candidates, all in the second half of the paper. In 4 of those questions the candidates giving the wrong response were spread over the other three responses.

In question 29 a higher percentage of candidates chose the wrong response than those who chose the correct response.

### Q 29 Algebra – quadratic equation

In response A, candidates were asked to find the roots of a quadratic equation in which the coefficient of  $x^2$  was not 1. The values given were correct but most candidates did not think so. The correct response was B which was chosen by only slightly fewer candidates. Here the factorisation of the quadratic gave  $(x - 5)(3x + 8) = 0$  from which the roots were given as

$$x = 5 \text{ and } x = -\frac{3}{8}.$$

As in previous sessions I offer a summary of questions and topics with the approximate percentage of candidates giving the correct responses.

Percentage obtaining the correct response	Question	Topic
91 – 100	7	Arithmetic – fractions
	11	Arithmetic – calculations
	26	Algebra – simultaneous equations
81 – 90	1	Arithmetic – operations
	4	Algebra – substitution of numbers in expressions
	5	Statistics – measurement of average and spread
	6	Geometry – area of rectangles and similar shapes
	9	Arithmetic – ratios
	13	Statistics – tally chart and mean value
	15	Algebra – sequences
	17	Graphs – conversion graph
	18	Arithmetic – definitions and percentages
	23	Arithmetic – standard form
	27	Arithmetic – error bounds
	28	Statistics – cumulative frequency

OCR Report to Centres – January 2014

71 – 80	2	Arithmetic – definitions
	8	Geometry – Pythagoras, ratio and area of triangle
	19	Arithmetic – mensuration
	25	Statistics – interpretation of bar chart
	36	Algebra – sequences
	39	Graphs – identification of quadratic curves
61 – 70	10	Algebra – rearrangement of formulae
	12	Algebra – quadratic equations
	16	Arithmetic – sensible units
	20	Geometry – equation of a straight line
	21	Probability
	24	Statistics – pie chart and percentages
	30	Vectors
	31	Arithmetic – areas and volumes
	32	Probability
	35	Algebra – addition of fractions
51 – 60	3	Algebra – solution of linear equations and inequalities
	14	Geometry – scale drawing
	22	Algebra – expansion of brackets and roots of quadratic
	40	Algebra – rates of change
41 – 50	34	Trigonometry
	37	Graphs – cubic curve
	38	Trigonometry – graphs of trigonometrical functions
31 – 40	29	Algebra – quadratic curve
	33	Trigonometry and speed

**Mark Scheme**

Question	Response	Question	Response
1	A	21	B
2	D	22	C
3	C	23	A
4	D	24	C
5	C	25	B
6	C	26	C
7	D	27	A
8	D	28	B
9	B	29	B
10	A	30	C
11	D	31	D
12	B	32	B
13	D	33	D
14	B	34	B
15	A	35	D
16	D	36	B
17	C	37	D
18	A	38	A
19	B	39	A
20	C	40	C
