

Home Economics Child Development

General Certificate of Secondary Education

Unit **B013**: Principles of Child Development

Mark Scheme for June 2013

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, , Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

S	<p>Short Answer Questions (requiring only a list by way of a response, usually worth only one mark per response)</p> <p>Where candidates are required to provide a set number of short answer responses then only the set number of responses should be marked. The response space should be marked from left to right on each line and then line by line until the required number of responses have been considered. The remaining responses should not then be marked. Examiners will have to apply judgement as to whether a 'second response' on a line is a development of the 'first response', rather than a separate, discrete response. (The underlying assumption is that the candidate is attempting to hedge their bets and therefore getting undue benefit rather than engaging with the question and giving the most relevant/correct responses.)</p>

2. Subject-specific Marking Instructions

Question		Answer	Marks	Guidance										
1	(a)	<p>ONE mark for each correct answer. FOUR required.</p> <table border="1"> <thead> <tr> <th>Description</th> <th>Method of contraception</th> </tr> </thead> <tbody> <tr> <td>Sometimes known as the mini pill</td> <td>POP (progesterone only pill)</td> </tr> <tr> <td>A small flexible tube placed under the skin of the upper arm</td> <td>Implant</td> </tr> <tr> <td>A small plastic or copper shape placed in the uterus by a doctor</td> <td>IUD (Intra Uterine Device)</td> </tr> <tr> <td>Identifying the fertile and infertile time during the menstrual cycle</td> <td>NFP (Natural family planning)</td> </tr> </tbody> </table>	Description	Method of contraception	Sometimes known as the mini pill	POP (progesterone only pill)	A small flexible tube placed under the skin of the upper arm	Implant	A small plastic or copper shape placed in the uterus by a doctor	IUD (Intra Uterine Device)	Identifying the fertile and infertile time during the menstrual cycle	NFP (Natural family planning)	4	
Description	Method of contraception													
Sometimes known as the mini pill	POP (progesterone only pill)													
A small flexible tube placed under the skin of the upper arm	Implant													
A small plastic or copper shape placed in the uterus by a doctor	IUD (Intra Uterine Device)													
Identifying the fertile and infertile time during the menstrual cycle	NFP (Natural family planning)													
1	(b)	<p>ONE mark for each correct answer. TWO required.</p> <p>No chemical agents/drugs/medication needed No physical devices used Acceptable to all faiths/cultures/for religious reasons No side effects/does not affect hormones No need to see GP/doctor No need to wait for hormones to settle if coming off the pill/implant</p>	2											
1	(c)	<p>ONE mark for correct answer. ONE required.</p> <p>Periods may be heavier/bleed more Periods may be longer Periods may be (more) painful Not suitable for women who have heavy periods Does not protect from STI's Does not protect from HIV</p>	1											

Question			Answer	Marks	Guidance
			Risk of body spontaneously expelling it Small risk of infection (20 days after being fitted) Uncomfortable/may be painful to fit Medical procedure to fit/may be embarrassing Has to be removed by a GP if want to become pregnant		
1	(d)		ONE mark for correct answer. ONE required. Saying "no"/abstention/not having sex/sexual intercourse/celibacy	1	
1	(e)		ONE mark for each correct answer. THREE required. Increase of the number of pregnancies outside marriage/teenage pregnancy More acceptable for a child to be in a lone parent family Less stigma attached to being a single parent/less pressure for women to be married Change in divorce rate/divorce is easier/more parents separating Society accepts divorce/more acceptable A parent may choose to have a child on their own More financial support/benefits for lone parents to live independently Surrogacy/sperm/egg donation/IVF for single women More single women choosing to adopt Women can support themselves More child care provision	3	
1	(f)	(i)	ONE mark for each correct answer. THREE required.
