OCR Report to Centres 2013-2014

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This report on the examination provides information on the performance of candidates which it is hoped will be useful to teachers in their preparation of candidates for future examinations. It is intended to be constructive and informative and to promote better understanding of the specification content, of the operation of the scheme of assessment and of the application of assessment criteria.

Reports should be read in conjunction with the published question papers and mark schemes for the examination.

OCR will not enter into any discussion or correspondence in connection with this report.

Cambridge Technical in Media Level 2

Administration

Introduction

This is the second year of the new Cambridge Technical in Media, the post-16 Level 2 course, which has replaced the OCR Nationals qualification. The qualification has attracted a high level of interest from those Centres who have migrated from traditional delivery of the BTEC vocational qualification. Take up by Centres seems to be due, in part, to the simple and clear unit layout design, which Centres have found easy to follow, the engagement of transferable skills and the opportunity to combine units to deliver projects which embrace the vocational nature of the qualification.

A crucial element in the successful delivery of the qualification has been the role of the Visiting Moderator who has continued to work to support Centres through the visiting moderation model. The Subject Expert Visits delivered by the Chief Coordinator and designated Visiting Moderators, which were undertaken throughout the year were embraced by Centres eager to take up the qualification and the strong skills base that it offers their students. In addition Centres running the course have taken the opportunity to access the Advisory Visits offered by OCR this year. The caller ID system has been a valuable additional resource for Centres who received direct responses to their enquiries.

As the qualification continues into its second year, Centres are extending their delivery of units selecting from the range of twenty available skills-based units. The Extended Certificate and the Diploma continue to be popular with Centres. Unit 1, which is the only mandatory unit, tends to be chosen by Centres as the natural starting point for learners.

Centres are encouraged to take the opportunity to link units within an overall project and it is good to see that this is a practice adopted by Centres delivering the qualification. It is also good to see that Centres have embraced the opportunity to invite practitioners in to deliver elements of the course and have used opportunities to place the units into 'live' scenarios where possible.

Resources

Experience would suggest that Centres on the whole, are well resourced and their equipment is relevant and current thereby providing learners with ample opportunities to fully develop their skills and understanding of media practice. Interestingly there seems to be a move in some Centres to deliver units through a cross departmental approach, as Centres seek to utilise their range of available teaching styles, thereby enabling learners to undertake some project-based scenarios, which can replicate the working environment.

Again there seems to be strong evidence that Centres are keen to develop relationships with external agencies where possible, such as established businesses, in order to create scenario based client briefs which support the vocational nature of the qualification and extend the range of learning opportunities available to learners.

Centres remain committed to keeping up-to-date with technological advances and continue to encourage learners to present their outcomes through a variety of digital resources, which has led to the presentation of professional looking portfolios of work that fully embrace the developments in technology. However, Centres are also reminded that the emphasis will always be on the evidence which should meet the grading criteria, and so typed portfolios are as acceptable as is more sophisticated online delivery of evidence.

Evidence

Centres continue to favour an approach to deliver two units simultaneously although a three or more unit approach has also been adopted where units are linked into a larger project. Centres have also tended to deliver Unit 1, as a theory based unit, which enables learners to be prepared for the practical units. Centres have tended to move away from a 'long and thin' approach to the delivery of their units, although this is an acceptable method of delivery it does mean that Centres may have to choose a later date for their first Moderation Visit.

Specific unit enquiries have raised the following issues:

Unit 01: Introducing media products and audiences

Continues to present challenges and Centres are reminded that learners need to concentrate on one media institution and one media product – demonstrating evidence of one media product being carried through the learning outcomes.

Therefore P2/M1/D1; P3/M2/D2; P4; P5/M3 should be evidenced through one media product this should be the same media product for all the above mentioned criteria. Centres should note that this media product should be produced by the institution the candidate has investigated in P1. So, in practical terms, if in P1 the candidate investigated an institution such as the BBC focusing on Radio 1 as the vehicle of their investigations, then for P2/M1/D1 the candidate should select a programme produced and broadcast by Radio 1. They could in this instance select any of Radio 1's Programmes.

Whilst Unit 1 is primarily a theory based unit enabling students to understand media institutions, how they work and the products they produce, learners should have the opportunity and are actively encouraged to evidence the grading criteria through a variety of mediums, (i.e. written presentations, verbal presentations, audio content, audio-visual content). In some Centres Unit 1 has been approached as an active information website, blog or Prezi.

Putting together a brief – Centres can stipulate the media institution or can leave this decision to the students to make their own choice of media institution to research, however the Centre must ensure that the choice of media institution enables the learner to achieve all the criteria at all levels in the grading grid.

Unit 31: Photography for media products

Centres are reminded that to achieve M1 learners must ensure that they seek relevant permissions. These could take the forms of model release and permissions to shoot on location, and can be evidenced through emails, letters, audio and audio-visual recordings.

Unit 14: Print-based advertising media

Centres are reminded that in order to achieve P1 learners must give consideration to seasonal and calendar events when scheduling launch dates, for instance when producing a plan for a print based advertisement for a new horror production, learners should take into account key seasonal dates such as Halloween.

Combination of Units – Centres are encouraged to link units together in a way, which best suits their resources and learning style. An example could be Unit 40 (Film and TV media products) where learners research, plan and produce a film, which could incorporate visual effects produced in Unit 41 (Visual effects for media products). There is also a link with Unit 50 (Sound for media products), in which the learners can produce the soundtrack for the production planned and produced in Unit 40 and the visual effects produced in Unit 41.

Where learners have developed pre-production material in one unit it is possible to utilise these pre-production materials across the linked units as long as the learner has contextualised the pre-production materials and met the grading criteria for each of the individual units they are intended for. The Moderator will expect to see the relevant pre-production materials, which meet

the grading criteria for each unit in each of the learners' unit portfolios. Risk assessments can be based on a Centre's blank pro forma document. Where a learner has already produced a risk assessment in one unit for a location it is possible to use this risk assessment for another unit as long as the risk assessment is contextualised, meets the grading criteria and identifies the relevant risks for the production the learners are undertaking within this new unit.

Centres may also find it beneficial to take the option of an early Moderation Visit and to utilise the two visits, which are available to them in the Academic Year, particularly where a linked delivery of units is intended, as it is important that moderators are provided with sufficient evidence to support all assessment criteria for each of the units covered. In instances where a 'project approach' is possible and provides an effective way to deliver more than one unit, it should be possible for moderators to easily access evidence for each of the assessment criteria for each unit. One way to achieve this could be the use of clear 'signposting' within the evidence provided, particularly if this is supported by a clear system which identifies where the evidence for each assessment criteria can be located. This should also clearly identify the centre assessor's decisions regarding how the learner has achieved each of the learning outcomes. Signposting is good practice even in instances where the unit has been approached in isolation.

Group Work – As many of the practical units naturally lend themselves to group work, Centres are reminded that evidence of the individual candidate's contribution to the group work must be clearly evidenced through the use of methods such as detailed witness statements, audio-visual and/or audio recordings, particularly if they are working as members of a production group. Centres cannot rely on implicit evidence for an individual learner as this will not be accepted by the Visiting Moderator. Indeed work for moderation must be available for the Visiting Moderator to view, as they cannot consider work, which is not accessible at moderation.

In these instances it is important that completed unit recording sheets must indicate the Centre's assessment decision as to why the candidate has achieved a particular grade. The Centre must indicate where the evidence can be found in the candidates' portfolio. Unit recording sheets can be completed manually. Video evidence would be acceptable as a means of evidence as long as it meets the learning outcome/s and grading criteria/s for the unit in question and is accessible to the Visiting Moderator. A Witness Statement could support video evidence particularly if there are areas of the Candidate's work which are not evidenced in the video evidence.

When producing material for an original media product, the material produced by learners must be evidenced in the form of material they have produced, for example in the instance of an audio-visual product the material could include rushes of the footage and/or audio samples/tracks. If the learner is producing audio samples/tracks, these must be evidenced with the intended visuals for the audio samples/tracks; in the instance of a print media product, learners must evidence these with print samples etc. As the material produced provides evidence of the learner's contribution to the production process and will therefore depend on the role the learner undertook in the production, particularly if they are working in a group, it is therefore important that learners produce material, which is must be evidenced separately from the final outcome. This predominantly affects units 40, 41, 50, 61 and 62 where learners are required to produce materials for use in a range of media products as specified by the unit.

In general Centres have presented evidence for the Visiting Moderator, which is accessible and signposted, although it continues to be an important aspect of the presentation of work to the Visiting Moderator and Centres are encouraged to look to ways in which this can be improved such as through the use of screenshots to evidence learners working in a practical capacity. Screen shots could also be used to provide evidence of candidates using desktop publishing tools, as learners can use annotations to provide evidence of their contribution to the group work. Production diaries are another effective way for learners to evidence their contribution and to also ensure that they meet the specific learning outcomes, as they can demonstrate their understanding and application of safe working practices. The Witness Statement continues to be

an effective way in which the tutor can verify the contribution of the individual learner, although this could be produced as an audio-visual, audio recording rather than paper based evidence if the tutor wished.

Assessment Practice

Centres are continuing to get to grips with the hurdle grid, however some Centres are still following a 'best fit' approach which means that in this instance some Visiting Moderators have had to withdraw units in instances where learners have not demonstrated that all the assessment criteria have been approached and/or presented at moderation, with Centres resubmitting work to be moderated at the next Moderation Visit. Essentially the Hurdle Grid means that the pass grade can only be awarded if all parts of the pass assessment criteria are present. The merit grade can only be awarded if all parts of the pass and merit assessment criteria have been met by learners and a distinction grade awarded to learners only when all parts of the pass, merit and distinction assessment criteria have been met.

It is advisable that Centres make use of clear target and completion dates, as a way in which to ensure that adequate time is available for the completion of all assessment criteria, and assist those learners who are aiming to achieve the merit and distinction criteria.

It is suggested that Centres would benefit from an early Moderation Visit, as in some instances Centres have elected to undertake both Moderation Visits later in the Academic Year and this can leave little or no time in which to ensure that all the assessment criteria are present for the Visiting Moderator.

Internal Standardisation

Centres need to ensure that they continue to strengthen their internal standardisation systems, in order to provide adequate support to Centre assessors. Moderators in particular have commented that in some instances Centres are using more consistent assessment as required by the qualification, however internal standardisation is a process which continues to require an accurate and consistent approach, particularly where there is more than one member of staff in a Centre.

Records

On the whole Centres appear to be maintaining effective records and making good use of Interchange for submission of grades. Centres are reminded that once a visit date has been arranged with the Visiting Moderator; grades should be entered onto Interchange at least two-weeks before the date of the Moderation Visit. It is not possible for Moderators to undertake visits where an entry has not been made on Interchange.

Centres are reminded that grades should be entered onto Interchange at least two-weeks before the planned date for the Moderation Visit, in order to make it possible for the Visiting Moderator to select the sample of work.

Centres are reminded that whilst the Visiting Moderator has requested a sample of learners' work for the Moderation Visit, it is a requirement that the full range of learners' work entered for moderation must be easily accessible in the room where the Moderation Visit is scheduled to take place.

Centres are also reminded of the importance of taking full advantage of their two free moderation visits, available to them each academic year, as these visits allow for useful feedback from the Visiting Moderator.
