Guide to Active Results

November 2014

OCR
Oxford Cambridge and RSA

OCR's Active Results is a free, online results analysis service that allows centres to review their pupils' results in detail, collectively or individually, from OCR examinations. This enables centres to comprehensively analyse their achievements and will also highlight any areas of the specification requiring a greater teaching focus.

For A Level Psychology, Active Results enables centres to review results in a variety of different ways:

- by centre and specification, comparing with the national proportions for each grade
- by candidate, showing raw marks against the national averages
- by candidate breakdown of topics
- by the candidate's individual marks for each question, compared against the national average (useful for candidates who are resitting to identify areas of weakness).

Reports can be generated and exported in a variety of formats and stored for student/centre records.

First of all you will need to access and log in to the OCR Interchange website using the url below.

https://interchange.ocr.org.uk

Welcome

You can use Interchange to securely access candidate information and online services for all OCR qualifications, 24 hours a day.

New features will be added over the coming months. Please check the OCR website and your email for information.
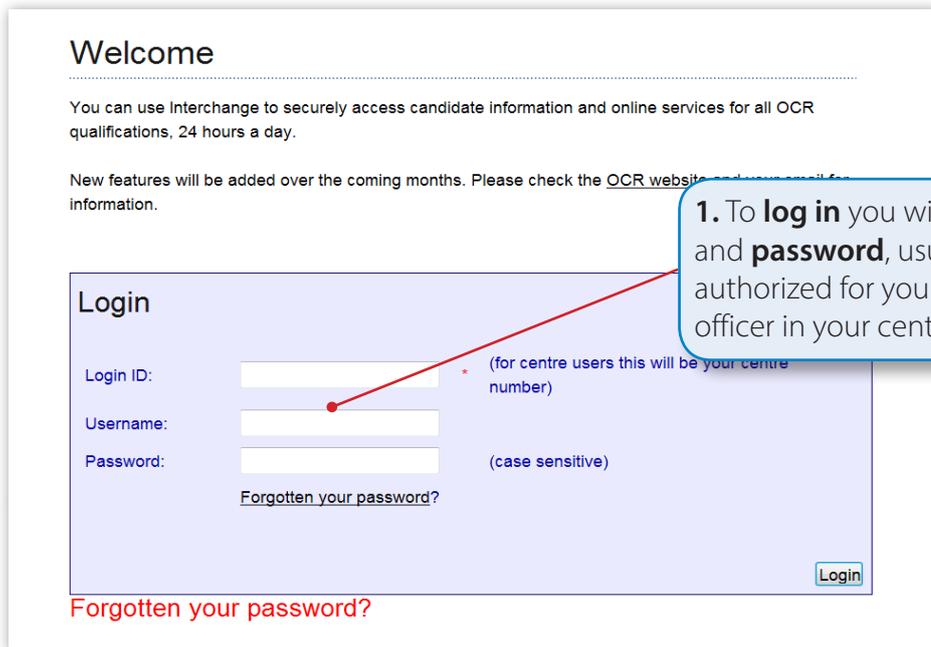

1. To **log in** you will require a **user name** and **password**, usually arranged and authorized for you by your examinations officer in your centre.
