

GCSE

Biology A

Unit **A161/01**: Modules B1, B2, B3 (Foundation Tier)

General Certificate of Secondary Education

Mark Scheme for June 2014

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

© OCR 2014

Annotations

Used in the detailed Mark Scheme:

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
(1)	separates marking points
not/reject	answers which are not worthy of credit
ignore	statements which are irrelevant - applies to neutral answers
allow/accept	answers that can be accepted
(words)	words which are not essential to gain credit
<u>words</u>	underlined words must be present in answer to score a mark
ecf	error carried forward
AW/owtte	credit alternative wording / or words to that effect
ORA	or reverse argument

Available in scoris to annotate scripts:

	Blank Page – this annotation must be used on all blank pages within an answer booklet (structured or unstructured) and on each page of an additional object where there is no candidate response.
	correct response
	incorrect response
	benefit of doubt
	no benefit of doubt
	error carried forward
	indicate level awarded for a question marked by level of response
	information omitted
	contradiction
	reject
	indicate uncertainty or ambiguity
	draw attention to particular part of candidate's response

ADDITIONAL OBJECTS: You **must** assess and annotate the additional objects for each script you mark. Where credit is awarded, appropriate annotation must be used. If no credit is to be awarded for the additional object, please use annotation as agreed at the SSU.

Subject-specific Marking Instructions

- a. Accept any clear, unambiguous response (including mis-spellings of scientific terms if they are *phonetically* correct, but always check the guidance column for exclusions).
- b. Crossed out answers should be considered only if no other response has been made. When marking crossed out responses, accept correct answers which are clear and unambiguous.

e.g. for a one-mark question where ticks in the third and fourth boxes are required for the mark:

✗
✗

*This would be worth
1 mark.*

✓
✗

*This would be worth
0 marks.*

✗
✗
✓
✓

*This would be worth
1 mark.*

c. Marking method for tick-box questions:

If there is a set of boxes, some of which should be ticked and others left empty, then judge the entire set of boxes.

If there is at least one tick, ignore crosses and other markings. If there are no ticks, accept clear, unambiguous indications, e.g. shading or crosses. Credit should be given according to the instructions given in the guidance column for the question. If more boxes are ticked than there are correct answers, then deduct one mark for each additional tick. Candidates cannot score less than zero marks.

e.g. if a question requires candidates to identify cities in England:

Edinburgh	<input type="checkbox"/>
Manchester	<input type="checkbox"/>
Paris	<input type="checkbox"/>
Southampton	<input type="checkbox"/>

the second and fourth boxes should have ticks (or other clear indication of choice) and the first and third should be blank (or have indication of choice crossed out).

Edinburgh			✓			✓	✓	✓	✓	
Manchester	✓	x	✓	✓	✓				✓	
Paris				✓	✓		✓	✓	✓	
Southampton	✓	x		✓		✓	✓		✓	
Score:	2	2	1	1	1	1	0	0	0	NR

- d For answers marked by levels of response:
- i. **Read through the whole answer from start to finish**
 - ii. **Decide the level that best fits** the answer – match the quality of the answer to the closest level descriptor
 - iii. **To determine the mark within the level**, consider the following:

Descriptor	Award mark
A good match to the level descriptor	The higher mark in the level
Just matches the level descriptor	The lower mark in the level

- iv. Use the **L1**, **L2**, **L3** annotations in Scoris to show your decision; do not use ticks.

Quality of Written Communication skills assessed in 6-mark extended writing questions include:

- appropriate use of correct scientific terms
- spelling, punctuation and grammar
- developing a structured, persuasive argument
- selecting and using evidence to support an argument
- considering different sides of a debate in a balanced way
- logical sequencing.

Question			Answer	Mark	Guidance															
1	a		<table border="1"> <tr> <td>memory loss</td> <td></td> </tr> <tr> <td>clumsiness</td> <td></td> </tr> <tr> <td>problems with digesting food</td> <td>✓</td> </tr> <tr> <td>production of thick mucus</td> <td>✓</td> </tr> <tr> <td>not able to concentrate</td> <td></td> </tr> </table> <p>(2)</p>	memory loss		clumsiness		problems with digesting food	✓	production of thick mucus	✓	not able to concentrate		2	allow any indication in correct box (does not have to be ticks) if more than 2 boxes ticked deduct one mark per extra tick					
memory loss																				
clumsiness																				
problems with digesting food	✓																			
production of thick mucus	✓																			
not able to concentrate																				
	b	i	<table border="1"> <tr> <td colspan="2"></td> <td colspan="2">Sharon</td> </tr> <tr> <td colspan="2"></td> <td>T</td> <td>t</td> </tr> <tr> <td rowspan="2">Eric</td> <td>T</td> <td>TT</td> <td>Tt</td> </tr> <tr> <td>t</td> <td>Tt</td> <td>tt</td> </tr> </table> <p>(2)</p>			Sharon				T	t	Eric	T	TT	Tt	t	Tt	tt	2	one mark for correct parent genotypes (both Tt) one mark for correct completion of Punnett Square ecf for correct completion of Punnett Square from their genotypes allow tT for Tt
		Sharon																		
		T	t																	
Eric	T	TT	Tt																	
	t	Tt	tt																	
	b	ii	0.25 / 1/4 / 25% / 1 in 4 / 1:3	1	ecf from Punnett Square i.e. this probability must match their Punnett Square in (b)(i) ignore 1 in 3 do not allow 3:1 / 4:1 / 1:4															

Question		Answer	Mark	Guidance
	c	<p>identify a positive reason for testing (1)</p> <p>(idea that) the benefits outweigh the risk (1)</p>	2	<p>allow idea of planning (even though given in the question) do not allow the idea that they want to know if the fetus has the disease unqualified</p> <p>allow inference that benefit outweighs the risk, e.g. "even though the test may be painful and inaccurate, it is more important to find out if the fetus has cystic fibrosis"</p> <p>note that mark-points may be linked, e.g. "benefits of being able to plan outweigh the possible problems" = 2 marks</p>
	d	<p>unethical / fetus is a living things with rights / should not interfere with nature / may harm the fetus/baby / may a cause a miscarriage (1)</p>	1	<p>allow religious argument do not allow vague references to harm ignore harm to mother/ideas about results being unreliable</p>
Total			8	

2	a		males: XY females: XX (1)	1	need both for the mark
	b	i	1000 (1)	1	
	b	ii	1200 (2)	2	<p>correct answer = 2 marks</p> <p>allow one mark for correct working $1.2 \times 1000 / (0.2 \times 1000) + 1000$</p>
	b	iii	<p>female fetuses terminated (1) female fetuses miscarried (1) disease affecting females fetuses (1) X sperm killed / more Y sperm (1) gender selection (1)</p>	2	<p>do not allow 'kill female baby'</p> <p>do not allow 'more boy sperm' 'female fetuses aborted because they want boys' = 2 marks</p>
Total				6	

Question	Answer	Mark	Guidance
3	<p>[Level 3] Answer describes the role of genes AND the environment in determining our characteristics AND gives examples of characteristics determined by each. Answer also describes that some characteristics are controlled by both genes and the environment. Quality of written communication does not impede communication of the science at this level. (5 – 6 marks)</p> <p>[Level 2] Answer describes the role of genes AND the environment in determining our characteristics AND gives at least one examples of characteristics determined by one of these. Quality of written communication partly impedes communication of the science at this level. (3 – 4 marks)</p> <p>[Level 1] Answer describes the role of genes OR the environment in determining our characteristics. Quality of written communication impedes communication of the science at this level. (1 – 2 marks)</p> <p>[Level 0] Insufficient or irrelevant science. Answer not worthy of credit. (0 marks)</p>	6	<p>This question is targeted at grades up to E</p> <p>Indicative scientific points may include:</p> <p>genetic:</p> <ul style="list-style-type: none"> • some characteristics are determined by genes/chromosomes/DNA/alleles • inherited from our parents • examples include blood group, dimples, eye colour, gender <p>environment:</p> <ul style="list-style-type: none"> • some characteristics are determined by our environment • not inherited • examples include scars, tattoos <p>both:</p> <ul style="list-style-type: none"> • some characteristics are determined by both • examples include height, weight, hair colour <p>ignore general references to ‘looks’ and ‘behaviour’ as examples (as given in stem of question)</p>
