

Data Sheet
GCSE (9–1) Gateway Combined Science A (Physics)
(J250/05, 06 & 11, 12)

The information in this sheet is for the use of candidates following GCSE (9–1)
Combined Science A (J250/05, 06 & 11, 12)

A copy of this sheet will be provided as an insert within the question paper for each
component.

Copies of this sheet may be used for teaching.

SPECIMEN

Equations in physics

$(\text{final velocity})^2 - (\text{initial velocity})^2 = 2 \times \text{acceleration} \times \text{distance}$

change in thermal energy = mass x specific heat capacity x change in temperature

thermal energy for a change of state = mass x specific latent heat

energy transferred in stretching = $0.5 \times \text{spring constant} \times (\text{extension})^2$

potential difference across primary coil x current in primary coil = potential difference across secondary coil x current in secondary coil

Higher tier only -

force on a conductor (at right angles to a magnetic field) carrying a current = magnetic field strength x current x length
