SAMPLE ASSESSMENT MATERIAL

Level 3 Cambridge Technical in IT
05838/ 05839/ 05840/ 05841/ 05842
Unit 2 Global information

Date – Morning/Afternoon
Time Allowed: 1 hour 30 minutes

INSTRUCTIONS
• Use black ink.
• Complete the boxes above with your name, centre number and candidate number.
• Answer all the questions.
• Write your answer to each question in the space provided.
• Do not write in the bar codes.

INFORMATION
• The case study should be used to answer questions in Section A.
• The total mark for this paper is 80.
• The marks for each question are shown in brackets [ ].
• Quality of extended response will be assessed in questions marked with an asterisk (*)
• This document consists of 12 pages.

You must have:
• The insert (clean copy case study)

First Name

Last Name

Centre Number

Candidate Number

Date of Birth

Section A

This section relates to the case study on Progress Vision.

1. The current Progress Vision website is basic. It uses static web pages and contains four information styles: text, graphics, animated graphics and video.

Progress Vision plans to make enhancements to its website. The aim is to raise awareness of the charity’s work and to increase donations.

(a) The enhanced website will use dynamic web pages instead of static web pages.

Explain one reason why Progress Vision would use dynamic webpages.

____________________________________________________________________________

____________________________________________________________________________

____________________________________________________________________________

____________________________________________________________________________

____________________________________________________________________________[2]

(b) The current Progress Visions website uses a limited range of information formats.

Identify two additional information formats that could be added to the enhanced website, justifying each of your choices.

1. __________________________________________________________________________

____________________________________________________________________________

____________________________________________________________________________

____________________________________________________________________________

____________________________________________________________________________

____________________________________________________________________________[4]
2. Progress Vision is reviewing its information security and personal data protection measures.

(a) Confidentiality is one of the principles of information security. Identify two other principles of information security.

1. ____________________________________________________________

2. ____________________________________________________________

(b) Identify one reason why Progress Vision might store backups of systems off-site. Justify how this action would secure the information.

Reason ____________________________________________________________

Justification ____________________________________________________________

2

(c) Explain two issues Progress Vision must consider when anonymising personal data.

1. ____________________________________________________________

2. ____________________________________________________________

4
3. Data relating to all of the glasses in stock is stored in the database table ‘Jobs’ (see Fig. 3).

(a)

(i) Identify the name of the field in the table that contains the Boolean information style.

__________________________________________________________________________ [1]

(ii) State one other information style used in the table.

__________________________________________________________________________ [1]

(b) The table contains a wide range of data about the work carried out in the optical workshop. Justify one data analysis tool the manager of the optical workshop could use to obtain useful information.

__________________________________________________________________________ [4]
4. Progress Vision gathers information from a wide range of sources.

(a) Describe what is meant by obfuscation, identifying one piece of data from the spreadsheet in Fig. 2 as an example.

____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________

(b) Progress Vision uses data for many different purposes. Identify two ways in which Progress Vision could use its data.

1. __________________________________________________________________________

2. __________________________________________________________________________

(c) Identify three logical protection measures, other than obfuscation, that could be used by Progress Vision to help keep information secure. Justify why each of these measures would keep information secure.

1. __________________________________________________________________________

2. __________________________________________________________________________

3. __________________________________________________________________________
5. The Chief Executive is concerned that Progress Vision does not fully meet information security and data protection legislation in the UK.

(a) State two current laws that Progress Vision must comply with when securing and protecting information.
1. ____________________________________________________
2. ____________________________________________________ [2]

(b) Explain two possible effects on Progress Vision if it were to lose or mishandle personal information.
1. ____________________________________________________
   ____________________________________________________
   ____________________________________________________
   ____________________________________________________
   ____________________________________________________
2. ____________________________________________________
   ____________________________________________________
   ____________________________________________________
   ____________________________________________________ [4]

(c) Explain possible actions that Progress Vision should take to comply with UK legislation relating to information security and data protection.
   ____________________________________________________
   ____________________________________________________
   ____________________________________________________
   ____________________________________________________
   ____________________________________________________
   ____________________________________________________
   ____________________________________________________ [6]
Section B
You do not need the case study to answer these questions.

6. An online retailer wants to analyse its sales data.

Table 1 below shows some of the phases of data analysis.

<table>
<thead>
<tr>
<th>Phase</th>
<th>Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>identify the need</td>
</tr>
<tr>
<td>2</td>
<td>define scope</td>
</tr>
<tr>
<td>3</td>
<td>identify potential sources</td>
</tr>
<tr>
<td>4</td>
<td>source and select information</td>
</tr>
<tr>
<td>5</td>
<td>select the most appropriate tools</td>
</tr>
<tr>
<td>6</td>
<td>process and analyse data</td>
</tr>
<tr>
<td>7</td>
<td>record and store information</td>
</tr>
<tr>
<td>8</td>
<td>share results</td>
</tr>
</tbody>
</table>

(a) Identify one example of an item that could be used to define the scope in phase 2.

__________________________________________________________________________________________[1]

(b) Explain one advantage and one disadvantage to the online retailer of using World Wide Web technologies.

Advantage__________________________________________________________________________________________

__________________________________________________________________________________________

__________________________________________________________________________________________

Disadvantage____________________________________________________________________________________

__________________________________________________________________________________________

__________________________________________________________________________________________

__________________________________________________________________________________________

__________________________________________________________________________________________[4]
(c) * Discuss the possible impacts that poor quality information could have for an online retailer.

____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________

7. Information is held by individuals and organisations globally.
(a) Explain one reason why working from home in a rural location might affect an individual’s ability to work remotely.
(b) * Analyse possible issues for organisations when transmitting sensitive data.

____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________

____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________

[10]
8. Organisations use information to carry out financial analysis and modelling. Explain one way in which an organisation could use financial analysis and modelling.

_________________________________________________________________________
_________________________________________________________________________
_________________________________________________________________________
_________________________________________________________________________
_________________________________________________________________________

9. Here is a data flow diagram showing how to apply for a place at a school.

(a) State one process shown in the data flow diagram.

_________________________________________________________________________
(b) Explain **one** feature that could affect the flow of information in the data flow diagram above.

____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
[2]

10. An international bank wants to improve its global image.

(a) The bank could use Green IT to enhance its brand image.

Describe **one** way in which Green IT could be implemented by the bank to improve sustainability.

____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
[2] 

(b) Explain **one** information-based technique that the bank could use for promotion and marketing.

____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________
____________________________________________________________________________

</thead>
</table>
| 1 (a)    | • It is easier to update across multiple pages (1) because each section of the web page is separate (1)  
• It is simpler for non-technical people to update the content (1) because the various parts of the page are all separate, and the content creator won’t need to know any HTML in order to create a new page or article for the site. (1) | 2 | Points marking approach.  
One mark for correct identification plus an additional one mark for valid explanation. |
| 1 (b)    | • Blogs(1) to allow field workers to share details of their work with others (1).  
• Educational resources(1) to help schools to become involved in fund raising for Progress Vision (1).  
• Discussion boards(1) to allow the charity to answer questions asked by people via the discussion board (1).  
• Any other valid suggestion. | 4 | Points marking approach.  
One mark for each correct identification up to a maximum of two identifications plus up to a further one mark for each of two justifications. |
| 2 (a)    | • Integrity (1)  
• Availability (1) | 2 | Points marking approach.  
One mark for each correct identification up to a maximum of two identifications. |
| 2 (b)    | • To ensure that an organisation’s data is kept secure (1) if anything happened to the location of the original data, there would be a backup copy which could be accessed (1)  
• Backup data can be accessed from any remote location (1) via the internet or FTP e.g. using the | 2 | Points marking approach.  
One mark for correct identification plus an additional one mark for valid justification. |
<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 (c)</td>
<td>The compromise between partial and complete anonymisation (1) and the potential loss of useful information (1). Data protection law does not apply to anonymous data (1) but there is the danger of re-identification of the person (1). Loss of public trust in the organisation (1) if data is insufficiently anonymised (1). Any other valid suggestion.</td>
</tr>
<tr>
<td>3 (a) (i)</td>
<td>Ready to ship (1).</td>
</tr>
<tr>
<td>3 (a) (ii)</td>
<td>Text (1). Numerical (1).</td>
</tr>
<tr>
<td>3 (b)</td>
<td>Visualisation of data (e.g. chart, graph, etc.) (1) because this could make it easier to see trends and patterns (1), makes data easier to understand (1) and information can be interpreted more quickly (1). Data cleaning (1) because this could reduce the size of the data table (1), making it easier to work with (1) it improves the quality of the data being used by removing errors (1) and it removes irrelevant data (1). Statistical analysis (1) as this would allow the manager to find out the percentages of each type of job (1), data could be interpreted correctly (1) and apparent relationships between the data could be confirmed as meaningful (1). Any other valid suggestion.</td>
</tr>
</tbody>
</table>

**Marks**

| 4 | Points marking approach. One mark for each correct identification up to a maximum of two identifications plus a further one mark for each of two explanations. |
| 1 | For one mark: |
| 1 | For one mark: |

**Guidance**

Points marking approach. One mark for correct identification plus an additional three marks for valid justification.
### Question 4 (a)
- Hiding/masking part or all of the data (1).
- Obscuring part or all of the data (1).
- Correct meaning worded differently (1).
- Any other valid suggestion.

Example is payment card (1).

#### Marks: 2

**Guidance:**
- Points marking approach.
- One mark for correct definition of term plus an additional one mark for valid example.

### Question 4 (b)
- Purchasing (1)
- Manufacturing (1)
- Marketing (1)
- Finance (1)
- Human resources (1)
- Any other valid suggestion.

#### Marks: 2

**Guidance:**
- Points marking approach.
- One mark for each correct identification up to a maximum of two identifications.

### Question 4 (c)
- Tiered levels of access to data (1) this can be used to reduce the number of people with access to sensitive data (1) and prevent people from having full access to data, which includes editing when they only need to read it, thereby reducing possible errors (1).
- Anti-malware applications (1) because this will help prevent viruses and worms from damaging data and systems (1) and will assist in the removal of unwanted software.
- Encryption of data at rest (1) because this will help prevent hackers from accessing any data that they find (1) and protect data when transporting data between locations (1).
- Electronic data shredding (1) to remove data securely from future access if hard drives or systems are sold/passed on (1) and to comply with all relevant data protection legislation and regulation as well as organisational policies (1).
- Any other valid suggestion.

#### Marks: 6

**Guidance:**
- Points marking approach.
- One mark for each correct identification up to a maximum of three identifications plus up to an additional two marks for each of three justifications.
<table>

</tr>
</thead>
</table>
| 5 (a) | • Data Protection Act 1998 (1).  
• Protection of Freedoms Act 2012 (1).  
• Freedom of Information Act 2000 (1).  
• Computer Misuse Act 1990 (1).  
• Copyright, Designs and Patents Act 1988 (1).  
• Information Commissioner’s Office (ICO) codes of practice (1).  
• Privacy and Electronic Communications Regulations 2003 (amended 2011) (1).  
• Any other valid suggestion. | 2 | Points marking approach.  
One mark for each correct identification up to a maximum of two identifications.  
Do not accept answers without dates.  
Do not accept DPA or RIPA. |
| 5 (b) | • Loss of reputation (1) because donors will not trust the charity if they hear about any loss or mishandling of personal information (1).  
• Fines from the UK Information Commissioner’s Office (1) because they might have broken the Data Protection Act (1998).  
• Reduced donations (1) because donors will not want their personal data held by Progress Vision (1).  
• Any other valid suggestion. | 4 | Points marking approach.  
One mark for each correct identification up to a maximum of two identifications plus up to an additional one mark for each of two explanations.  
Accept: use of ICO and/or DPA within otherwise correct answers.  
Do not accept generic explanations e.g. lose money, get a bad name. |
<table>

<th>Indicative content:</th>
<th>Marks</th>
<th>Guidance</th>
</tr>
</thead>
</table>
| 5 (c) | - Follow relevant ICO codes of practice because this will ensure that best practice will be followed and it will also ensure that the charity complies with the Data Protection Act 1998.  
- Effective internal assessment of compliance with UK legislation because this will identify weaknesses in Progress Vision’s information security and then allow them to make the changes needed to comply with the law.  
- Physical protection in place for information because this will limit access to only those who are authorised and know the keypad code and data will be backed up in case of problems. | 6 | Levels of response marking approach. |
| | | 5-6 marks | Has explained what Progress Vision should take and given two or more examples. |
| | | 3-4 marks | Has described possible actions that Progress Vision should take and given at least one example or has explained what Progress Visions should take and given no examples. |
| | | 1-2 marks | Has identified possible actions that Progress Vision should take. May be no example. |
| | | 0 marks | Nothing worth of credit. |

| 6 (c)*   | Indicative content: Quality of information that may be poor:  
  - reliability  
  - validity  
  - relevance  
  - accuracy  
  - time frame  
  - accessibility  
  - cost-effectiveness  
  - appropriateness.  
  Negative impact of poor quality information:  
  - on reputation due to negative reviews from customers online.  
  - on ability to respond to customers’ needs.  
  - on delivery times caused by inaccurate stock information.  
  - on profits due to poor management decisions based on out of date information.  
  - on sales due to declining customer base.  
  - on returns as incorrect items sent out due to unreliable order details.  
| 10       | Levels of response marking approach.  
  7-10 marks | Has shown a detailed level of understanding by discussing the impacts that poor quality information could have for an online retailer. The learner is able to provide a clear explanation of more than one impact and the consequence of these impacts. Relevant examples will be used to support discussion and ideas will be expressed clearly and fluently.  
  There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.  
  4-6 marks | Has shown a good level of understanding by explaining the impact(s) that poor quality information could have for an online retailer. Explanations may concentrate on either the impact or the consequence with limited depth in the expansions. Some examples used to support explanation may not be relevant and may at times detract from fluency of narrative.  
  There is a line of reasoning presented with some structure. The information presented is in the most part relevant and supported by some evidence.  
  1-3 marks | Has identified points relevant to the impact that poor quality information could have for an online retailer. Limited use of examples to accompany description and ideas will be poorly expressed.  
  The information is basic and communicated in an unstructured way. The information is supported by limited evidence and the relationship to the evidence may not be clear.  
  0 marks | Nothing worthy of credit |
