

A Project Approach to Delivery: Planning and delivering a tennis event

For this project you will investigate, research and plan to deliver and evaluate a tennis based event. This may well take the form of a tennis festival and/or competition but could also be a series of tennis based sessions or similar. In order to meet the units and learning outcomes included in this project the tennis 'event' should include a skills development aspect as well as some form of competitive game based activity.

The following topics relating to planning and implementing a tennis based event are included in this project approach:

- Principles of coaching and leadership
- Planning tennis activities/event
- Safety and safeguarding
- Delivering a tennis event
- Improving fitness for tennis
- Analysing and giving feedback on tennis performance
- Reviewing a tennis event.
