

Giving your students the edge

Our **Extended Project Qualification** can provide your students with the skills that universities look for, to help them stand out from the crowd.

Four steps to success

It's straightforward for your students to take our inspiring EPQ. They can enjoy the freedom of working in their own way as they undertake a project based either on a subject they're studying or in an area of personal interest.

With its skills-based assessed assignment, the qualification is ideal for helping students improve transferable skills such as planning, research, analysis and evaluation, and they can take it as part of either an academic or a vocational curriculum.

It's the equivalent of an AS Level and designed as a one-year course.

More straightforward for you to teach

- Our EPQ is simpler for you to administrate and assess
- Less paperwork means a more flexible course that enables students to be more innovative, creative and entrepreneurial
- The whole assessment is supported with quality resources and supporting materials that give you even more clarity about how to assess.

Three more reasons to deliver the EPQ

- It's worth up to 28 UCAS points
- There's real flexibility and ease of delivery – it can be taught by non-specialist staff and run over one or two years, and it has two entry points (January and June)
- Fewer guided learning hours than AS level and requires fewer resources.
