Mark Scheme for January 2018

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

Annotations

Annotation	Meaning
Tick	correct
Cross	incorrect
BOD	benefit of the doubt
Eg	example
Und	understanding
Max	maximum marks reached / sub-max reached
L1	Level 1 (for 'Levels-marked' questions only) – put at end of response to indicate level awarded
L2	Level 2 (for 'Levels-marked' questions only) – put at end of response to indicate level awarded
L3	Level 3 (for 'Levels-marked' questions only) – put at end of response to indicate level awarded
Id	identification (use for levels questions instead of 'knowledge' with Und being used for more developed points)
R	Repeat of point already made
NBD	no benefit of the doubt - use as alternative to Vg (vague) and also for SEEN

Examiner Guidance on annotations

1. Read and obey the instructions that preface the mark scheme.
2. General guidance:
 - mark in red ink (supervisors mark scripts they are sampling in green)
 - record the total mark for each **part question** (e.g. question 4 (a)) in the right hand margin
 - record the total mark for each **whole question/section** (e.g. question 4 (a), (b) and (c) total) at the end of the question in right hand margin – circle this total mark
3. For Multiple-Choice Questions (MCQs), use a **tick** or a **cross** to the right hand side of the option indicated by the learner as being their answer.
4. For points-marked questions (the majority):
 - Structured scheme: one mark = one point, represented by a tick

- Keep referring to the requirements of each question
- Take into consideration the sub-max for parts of the question where applicable and indicate 'max' has been reached for each part as appropriate
- Ringed mark at the end of each whole question only
- Use only the agreed annotations when marking.

5. For the levels marked questions:

- Keep checking for relevance of the response to the requirements of the question
- Give '**Id**' for each numbered point in the MS indicative content (don't record the numbered point)
- Give '**Und**' for every point that has been sufficiently developed and shown understanding (often, but not always, indicated by a bullet point in the MS)
- Put '**Eg**' in the LH margin if a valid, relevant and accurate practical example is given
- Use other usual annotations on the body of the script.

- Now review again the answer.
- Remember to keep checking whether the response actually answers the question set.
- REVIEW THE LEVELS' DESCRIPTORS AND ESPECIALLY THE DISCRIMINATOR POINTS TO PINPOINT THE MARK.
- Write the final mark for the question at the end of the response in the RH margin and also indicate the level awarded (**L1**, **L2** or **L3**).

FINALLY – remember that

- Some learners may make relatively few points but develop them well to show good understanding, meet well the generic criteria descriptors in the top level and answer all parts of the question and therefore score well.
- Some learners may make many points but may not show the depth of analysis required to match the generic criteria descriptors in the top level and therefore score less well.
- Do not be afraid to give full marks if all descriptors / discriminators are met at the required level.
- It is unlikely for learners to score 0 (nil) marks if they have attempted to answer the question set, unless the material is entirely irrelevant.
- Use your professional judgement and contact your Team Leader if you need help in applying the scheme.

THEN:

- Add up the marks for the whole question and put in RH margin and circle.
- Record all question totals on the front of the script in the grid provided on the cover.
- Add up these question totals to give a final mark and record on top left of script encircled.
- Check for arithmetical errors.
- Transfer question totals to the online mark sheet and make sure the total mark on the online mark sheet agrees with the total on the question paper.
- Ensure marks are legible on the question paper.
- Ensure every page of script is annotated – cross through blank pages and if additional pages/material has been provided and considered in the marking, annotate this in the usual way to indicate any credit given or use 'NBD' if the material has not attracted additional marks to show it has been seen.
