THE QUALIFICATION

At the heart of this specification there are interesting and relevant media products for study and contemporary media production briefs that allow for flexibility in approach while having a clearly defined outcome for your students.

It means they can study the media in an academic context and apply the knowledge they've gained in the process of creating their own media production.

It's designed to widen their intellectual horizons through analysing a broad range of media forms and contexts. They'll also be able to develop a wider understanding of the media in both a historical and contemporary context.

The approach we've taken in this specification allows you and your students to engage confidently with critical and theoretical approaches from the perspectives of both analytical consumers and producers of media products.

- Television and promoting media (01) – a written paper
- Music and news (02) – a written paper
