

Command words (specific mathematical meaning)

Some of these command words will be in your exam. Make sure you read the full question in your exam.

| Estimate | Check, without a calculator, the result of a calculation by using suitable approximations. OR Give a reasonable numeric value that can be justified by the information in the question. |
|--|--|
| Construct | Use mathematical instruments to draw accurately. Geometric instruments may be specified in the question. When constructing with compasses and a straight edge, show all of the arcs and lines that you use to make the construction. |
| Shade | Indicate, on a graph or a drawing, a region according to given conditions. |
| Enlarge, Rotate, Reflect, Translate | Carry out the requested transformation. |
| Expand, Multiply out | Multiply to remove brackets from a given expression to obtain an equivalent. |
| Factorise | Simplify a given expression by writing it as a product of two or more factors. |
| Rearrange | Used with formulae, when students are requested to change the subject of a formula. |
| Round | Write values correct to the specific accuracy required. |
| Simplify | Make a given algebraic expression/fraction/ratio as simple as possible. |
| Solve by | Use the method specified in the question to solve an equation or inequality. |
| Write in the form | Manipulate a given algebraic expression/fraction/ratio into the specified form or provide an answer in a particular way e.g. when giving an exact answer as a surd. |

N.B. Other words that are commonly used in English are used with their standard English meaning.
