

Command words (specific mathematical meaning)

Some of these command words will be in your exam. Make sure you read the full question in your exam.

Estimate	Check, without a calculator, the result of a calculation by using suitable approximations. OR Give a reasonable numeric value that can be justified by the information in the question.
Construct	Use mathematical instruments to draw accurately. Geometric instruments may be specified in the question. When constructing with compasses and a straight edge, show all of the arcs and lines that you use to make the construction.
Shade	Indicate, on a graph or a drawing, a region according to given conditions.
Enlarge, Rotate, Reflect, Translate	Carry out the requested transformation.
Expand, Multiply out	Multiply to remove brackets from a given expression to obtain an equivalent.
Factorise	Simplify a given expression by writing it as a product of two or more factors.
Rearrange	Used with formulae, when students are requested to change the subject of a formula.
Round	Write values correct to the specific accuracy required.
Simplify	Make a given algebraic expression/fraction/ratio as simple as possible.
Solve by	Use the method specified in the question to solve an equation or inequality.
Write in the form	Manipulate a given algebraic expression/fraction/ratio into the specified form or provide an answer in a particular way e.g. when giving an exact answer as a surd.

N.B. Other words that are commonly used in English are used with their standard English meaning.
