Problem Solving

Formulae and Statistical Tables (ST1)

Time allowed: 2 hours

INSTRUCTIONS

- Do **not** send this Booklet for marking. Keep it in the centre or recycle it.

INFORMATION

- This document has **8** pages.

STATISTICS: HYPOTHESIS TESTS

Description	Test statistic
Spearman rank correlation test	$r_s = 1 - \frac{6 \sum d_i^2}{n(n^2 - 1)}$
χ^2 test	$X^2 = \sum \frac{(f_o - f_e)^2}{f_e}$

CRITICAL VALUES FOR CORRELATION COEFFICIENTS

THE NORMAL DISTRIBUTION AND ITS INVERSE

The Normal distribution: values of $\Phi(z) = p$

The table gives the probability, p , of a random variable distributed as $N(0, 1)$ being less than z .

(add)

**Copyright Information**

OCR is committed to seeking permission to reproduce all third-party content that it uses in its assessment materials. OCR has attempted to identify and contact all copyright holders whose work is used in this paper. To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced in the OCR Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download from our public website (www.ocr.org.uk) after the live examination series.

If OCR has unwittingly failed to correctly acknowledge or clear any third-party content in this assessment material, OCR will be happy to correct its mistake at the earliest possible opportunity.

For queries or further information please contact The OCR Copyright Team, The Triangle Building, Shaftesbury Road, Cambridge CB2 8EA.

OCR is part of the Cambridge Assessment Group; Cambridge Assessment is the brand name of University of Cambridge Local Examinations Syndicate (UCLES), which is itself a department of the University of Cambridge.
