General Certificate of Secondary Education

Mark Scheme for Autumn 2021

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2021

1. Annotations available in RM Assessor

Annotation	Meaning
\checkmark	Correct response
×	Incorrect response
	Omission mark
BOD	Benefit of doubt given
CON	Contradiction
RE	Rounding error
SF	Error in number of significant figures
ECF	Error carried forward
L1	Level 1
L2	Level 2
L3	Level 3
NBOD	Benefit of doubt not given
SEEN	Noted but no credit given
I	Ignore

2. Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
1	alternative and acceptable answers for the same marking point
×	Separates marking points
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
-	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

3. Subject-specific Marking Instructions

INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

The breakdown of Assessment Objectives:

	Assessment Objective
AO1	Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.
AO1.1	Demonstrate knowledge and understanding of scientific ideas.
AO1.2	Demonstrate knowledge and understanding of scientific techniques and procedures.
AO2	Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.
AO2.1	Apply knowledge and understanding of scientific ideas.
AO2.2	Apply knowledge and understanding of scientific enquiry, techniques and procedures.
AO3	Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures.
AO3.1	Analyse information and ideas to interpret and evaluate.
AO3.1a	Analyse information and ideas to interpret.
AO3.1b	Analyse information and ideas to evaluate.
AO3.2	Analyse information and ideas to make judgements and draw conclusions.
AO3.2a	Analyse information and ideas to make judgements.
AO3.2b	Analyse information and ideas to draw conclusions.
AO3.3	Analyse information and ideas to develop and improve experimental procedures.
AO3.3a	Analyse information and ideas to develop experimental procedures.
AO3.3b	Analyse information and ideas to improve experimental procedures.

For answers to section A if an answer box is blank ALLOW correct indication of answer e.g. circled or underlined.

C	Question		Answer			AO element	Guidance	
18	(a)		Causes them to divide uncontrollably Makes them produce antibodies Makes them start producing hormones Stops them dividing by mitosis	 ✓ ✓ 		1.1		
	(b)	 (b) Oestrogen is made in the ovaries ✓ Oestrogen levels will fall ✓ 			2	2 x 2.1	ALLOW no oestrogen produced	
	(C)	(i)	First check answer on the answer line If answer = 45000 award 3 marks $30\ 000\ 000\ /\ 400\ =\ 75\ 000\ \checkmark$ $75\ 000\ \times\ \frac{60}{100}$ = 45\ 000 (females) \checkmark		3	3 x 2.2		
		(ii)	Any two from: May not actually develop breast cancer ✓Would not be able to produce eggs ✓Possible side effects of reduced oestrogen ✓		2	2 x 3.1b	ALLOW only a 60% chance ALLOW would not be able to have children ALLOW reference to menopause	

C	Question				Answer			Marks	AO element	Guidance
19	(a)	(i)		le) beca		evelop CJD ✓ a child/parent wh	0	2	2 x 3.1a	ALLOW her mother can only pass on d (allele) / passes on d (allele) to child
		(ii)	person A probability =	D d 0.5 / 50	d Dd dd 0% / ½ ✓	d Dd dd	 	2	2.2 3.2b	ALLOW 1 in 2 / 1:1 / ² / ₄
	(b)	 (b) Any two from: Make sure it is safe / identify side effects ✓ To see if it works ✓ To find the correct dosage ✓ 			2	2 x 1.2	ALLOW could go wrong / unknown effect IGNORE can't test on humans ALLOW see results			

Question Answer	Marks	AO element	Guidance	
Question Answer 20* Please refer to the marking instructions on page this mark scheme for guidance on how to mark question. Level 3 (5–6 marks) Provides a detailed explanation of the problems China regarding food security. AND Provides a detailed explanation of how China is changing its food production to solve these proteins and logically structured. The information pris relevant and substantiated. Level 2 (3–4 marks) Provides a detailed explanation of the problems China regarding food security OR Provides a detailed explanation of how China is changing its food production to solve these proteins China regarding food security OR Provides a detailed explanation of the problems fa China regarding food security. AND Provides a basic explanation of the problems fa China regarding food security. AND Provides a basic explanation of the problems fa China regarding food security. AND Provides a basic explanation of the problems fa China regarding food security. AND Provides a basic explanation of how China is changing its food production to solve these problems. There is a line of reasoning presented with som structure. The information presented is relevant supported by some evidence. Level 1 (1–2 marks) Provides a basic explanation of the problems fa China regarding food security.	4 of this 6 facing Image: second sec		Guidance AO2.1 Apply knowledge and understanding of the issues threatening food security. • population in China has increased • e.g. population is 1400 million in 2015 compared to 660 million in 1960 • so, a greater demand for food • however less land is available to grow food • e.g. area of land available to grow now 26 million of hectares in 2014 compared to 36 million of hectares in 1969 AO3.1b Analyse information and ideas to draw conclusions about how China is maintaining food security. • have developed hybrid rice • hybrid rice has a higher yield than old types of rice • e.g. yield is 3100 kg/hectare compared to 2100 • percentage of rice grown that is hybrid rice is increasing • able to grow more rice on the same area of land	

Mark Scheme

October 2021

Question	Answer	Marks	AO element	Guidance
	Provides a basic explanation of how China is changing its food production to solve these problems.			
	There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.			
	0 marks No response or no response worthy of credit.			

C	Question	Answer	Marks	AO Marks element	Guidance
21	(a)	(Haemoglobin is) needed to carry oxygen around the body ✓	2	2 x 1.1	ALLOW form oxyhaemoglobin ALLOW cells won't get oxygen
		Respiration could not occur / (cells would have) no energy/ATP \checkmark			
	(b)	Any two from: Reference to how the change occurred e.g. mutation for green colour / idea that there is natural variation in the population√	3	2 x 2.1	ALLOW ORA for each making point
		Green skinks are better camouflaged / more likely to survive / less likely to be eaten \checkmark			AW for camouflaged – less likely to be seen
		They will reproduce ✓			ALLOW they will produce offspring/breed together
		Pass on the allele/gene for green colour ✓		1.1	ALLOW pass on advantageous gene IGNORE trait is passed on / genes are passed on
	(c)	Put the different coloured skinks on the floor of the forest/in the skinks' habitat ✓	2	2 x 3.3a	IGNORE ideas linked to a fair test e.g. making sure the models are the same size
		Count how many predators were attracted to each colour of skink \checkmark			ALLOW which colour attracts the most predators

J247/02

Question		Answer		AO element	Guidance
 (d)		How many genes a person has	1	1.1	
		The environment			
		The number of chromosomes a person has			
		Whether a person has a Y chromosome 🗸			
(e)	(i)	First check answer on the answer line If answer = 168 award 2 marks	2	2 x 2.2	
		56% of 300 ✓ = 168 ✓			
	(ii)	Small(er) eggs produce more males ✓	1	3.1a	
	(iii)	Testosterone is the male (sex) hormone \checkmark	2	1.1	
		Idea that higher levels of testosterone made more of the embryos develop as males / male (embryos) will make more testosterone ✓		3.1b	

C	Question		Answer	Marks	AO element	Guidance
22	(a)		<i>Quadrat:</i> Sample the plants (in the hedge) ✓	3	3 x 1.2	ALLOW random placement ALLOW idea that the small area is representative of the rest of the hedge
			Count the number (of different species) in the quadrat ✓ <i>Key:</i>			
			Identify the species of plants ✓			ALLOW key to identify species so they can be counted = 2 marks if counted not credited for quadrat
	(b)	(i)	All correct points correctly plotted ✓✓	2	2 x 2.2	ALLOW +/- half a square 0 to 2 correct points plotted = 0 mark 3 or 4 correct points plotted = 1 mark All 5 correct points plotted = 2 marks
		(ii)	Correctly drawn line of best fit ✓	1	2.2	ALLOW best straight line or smooth curve DO NOT ALLOW dot to dot line ALLOW line of best fit for their plotting IGNORE any extrapolation of line DO NOT ALLOW double lines
		(iii)	FIRST CHECK ANSWER ON THE ANSWER LINE If answer = 261 (years) award 2 marks 2.1 x 110 + 30 ✓ = 261 (years) ✓	2	2 x 2.2	

Mark Scheme

(Question		Answer	Marks	AO element	Guidance	
		(iv)	Yes (no mark) As the age of field increases the area of the field decreases ✓ D/oldest field has small area and E/newest field has large area / 261yr old/oldest field has 1500m ² area and 162yr old/newest field has 10 000m ² area ✓	2	2 x 3.2b	IF ANSWER IS NO THEN ZERO MARKS	
	(C)		Blackbirds eat/kill greenfly and/or caterpillars ✓ Less wheat will be eaten ✓	2	2 x 3.1a	 ALLOW blackbirds are predators to the greenfly and/or caterpillars ALLOW blackbirds hunt greenfly and/or caterpillars ALLOW greenfly and/or caterpillars are blackbirds prey ALLOW decrease consumers of the wheat 	

Mark Scheme

Question		on	Answer		Marks	AO element	Guidance
23	(a)		Acid will decrease the pH and cause the enzyme to change shape.	✓	2	2 x 2.1	More than 2 boxes ticked then each additional incorrect box negates a mark
			Acid will increase the pH and cause the enzyme to change shape.				
			Acid will increase the pH and cause the substrate to change shape.				
			The enzyme will not fit into the active site of the substrate.				
			The substrate will denature The substrate will not fit into the active site of the	\checkmark			
			enzyme.	v			
	(b)	(i)	(Distilled) water ✓		1	2.2	
		(ii)	Yes:		2	2 x 3.2a	
			Increasing concentrations (of sulfur dioxide) are linke lower rates of photosynthesis ✓ No:	ed to			ALLOW sulfur dioxide reduces the rate of photosynthesis IGNORE pH/acid references
			Because there is no evidence that it is due to sulfur dioxide being an acid \checkmark				ALLOW reference to a correlation and not a cause/no causal mechanism
		(iii)	Use different acids ✓		1	3.3b	IGNORE measure the pH to show it is an acid IGNORE repeat experiment with different concentrations of sulphuric acid
