

Cambridge Technicals

Unit: Cloud Technology

Level 3 Cambridge Technical in IT

Mark Scheme for June 2022

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

Question	Answer				Marks	
1	D - It is widely accessible			1		
2	A - Allows additional resources to be provisioned automatically				1	
3	C - Pay as you grow				1	
4	A - Cloud bursting				1	
5	B - Cloud service provider is responsible for the maintenance C - Hosted by a single cloud service provider E - Used by multiple organisations				1	
6	True			1		
7	A - A collection of resources that can be managed as a single unit			1		
8	A - Business growth is uncertain D - They will not need to spend any money on IT infrastructure			1		
9	False			1		
10	C - 2, 3 and 4				1	
11	A - The data is too sensitive to be placed in a cloud environment			1		
12	B - The health service has made considerable investment in its own IT infrastructure			1		
13	Cloud E	On-Premises B D	Both A C		1	
14	C - Monitoring cloud res	ources			1	

Question	Answer	Marks			
15	C - 2, 3 and 4	1			
16		1			
	Cloud Technology Outsourcing Both				
	AB				
	C C				
	D D				
17	B - 1, 3 and 4	1			
18	A - Purchase of additional servers	1			
19	A - Time from initial idea to availability for end user	1			
20	A - It allows end users to download anytime	1			
21	Accuracy - The data is error free				
	Consistency - Where multiple copies of the data are stored, they are the same				
	Validity - Data is sensible, reasonable and meets data input rules				
22	A - It can improve security as you can see who is accessing what data				
	B - It can increase accessibility as frequently accessed data can be made easier to locate				
	C - It can reduce costs as data that is not used can be removed				
23	False				
24	A - Hard disk				
	C - Server				
	D - Switch				
25	D - Developers do not need to worry about the infrastructure prior to development	1			

Question	Answer		
26	The service designed around the needs of the user has dynamic content. This means that the more you use it the more it will adjust to you without any manual customisations.		
27	C - PaaS		
28	B - IaaS	1	
29	D - XaaS		
30	IaaS - Manages the physical processing PaaS - Pre-configures the platform SaaS - Implements and manages the cloud service		
31	B - PaaS		
32	A - CPU C - Memory D - Storage		
33	B - IaaS		
34	A - A platform that allows the organisation to access applications		
35	IaaS - Access to the virtualised infrastructure PaaS - Access to the IT resources relevant to the platform they are using SaaS - Access to the front end user interface only		
36	Develop application Use application Both C A B	1	

Question	Answer	Marks		
37	D - Technical	1		
38	B - Project management	1		
39	D - Vendor management			
40	B - Data integration			
41	A - Business and financial			
42	C - Security and compliance			
43	A - QoS	1		
44	C - Multifactor Authentication (MFA) D - Token E - Username and password	1		
45	B - Portability C - Rapid deployment D - Shared resources	1		
46	Cloud orchestration automates the management of computer services. It can be used to provision , deploy and start servers. There are three main attributes of cloud orchestration – service, workload and resource orchestration.			
47	 Power comes from national grid Power comes via diesel/gas backup generator Power comes via transformer Power comes through the main distribution board Power comes through the uninterrupted power supply Power delivered to end device 	1		
48	False	1		

Question	stion Answer	
49	D - Versioning	1
50	B - The file can be edited via the browser	1
51	True	1
52	A - 1, 2 and 3	1
53	 Select your preferred device Order hard drive Power up device when it arrives Connect to your LAN Transfer data Return the device to AWS 	1
54	 A - Allows for an increase in computing power as demand increases B - Allows storage to rapidly increase or decrease meaning the business is only paying for what is needed when needed, saving money E - Reduces initial expenditure on powerful computer equipment when the business is starting up 	1
55	True	1
56	A - Identify cloud service opportunities based on business needs	1
57	D - Technical	1
58	A - Advise on application lifecycle	1

Question			Answer	Marks
59				1
	Included	Excluded		
	В	A		
	E	С		
		D		
60	A - Mean time to repair			1
61	C - Individuals cannot make changes on their own			1
62	B - A list of disasters the client will be informed about			1
63	D - So the customer knows who is using their data			1
64	B - The customer of the cloud provider			1
65	False			1
66	B - Appropriate safeguards	are in place		1
	C - Standard Contractual Clauses exist with the receiving organisation			
	D - The receiving organisat	ion is in a country tha	at is covered by UK 'adequacy regulations'	
67	True			1
68	D - Making sure the data is not repeated			1
69	False			1
70	D - Multiple customers sha	re the same resource	28	1
