AS Level

**Mark Scheme for June 2024**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2024

## MARKING INSTRUCTIONS

### PREPARATION FOR MARKING RM ASSESSOR

1. Make sure that you have accessed and completed the relevant training packages for on-screen marking: *RM Assessor Assessor Online Training*; *OCR Essential Guide to Marking*.
2. Make sure that you have read and understood the mark scheme and the question paper for this unit. These are posted on the RM Cambridge Assessment Support Portal <http://www.rm.com/support/ca>
3. Log-in to RM Assessor and mark the **required number** of practice responses (“scripts”) and the **number of required** standardisation responses.

YOU MUST MARK 10 PRACTICE AND 10 STANDARDISATION RESPONSES BEFORE YOU CAN BE APPROVED TO MARK LIVE SCRIPTS.

### MARKING

1. Mark strictly to the mark scheme.
2. Marks awarded must relate directly to the marking criteria.
3. The schedule of dates is very important. It is essential that you meet the RM Assessor 50% and 100% (traditional 40% Batch 1 and 100% Batch 2) deadlines. If you experience problems, you must contact your Team Leader (Supervisor) without delay.
4. If you are in any doubt about applying the mark scheme, consult your Team Leader by telephone or the RM Assessor messaging system, or by email.
5. **Crossed Out Responses**  
Where a candidate has crossed out a response and provided a clear alternative then the crossed out response is not marked. Where no alternative response has been provided, examiners may give candidates the benefit of the doubt and mark the crossed out response where legible.

**Rubric Error Responses – Optional Questions**

Where candidates have a choice of question across a whole paper or a whole section and have provided more answers than required, then all responses are marked and the highest mark allowable within the rubric is given. Enter a mark for each question answered into RM assessor, which will select the highest mark from those awarded. *(The underlying assumption is that the candidate has penalised themselves by attempting more questions than necessary in the time allowed.)*

**Multiple Choice Question Responses**

When a multiple choice question has only a single, correct response and a candidate provides two responses (even if one of these responses is correct), then no mark should be awarded (as it is not possible to determine which was the first response selected by the candidate). *When a question requires candidates to select more than one option/multiple options, then local marking arrangements need to ensure consistency of approach.*

**Contradictory Responses**

When a candidate provides contradictory responses, then no mark should be awarded, even if one of the answers is correct.

Short Answer Questions (requiring only a list by way of a response, usually worth only **one mark per response**)

Where candidates are required to provide a set number of short answer responses then only the set number of responses should be marked. The response space should be marked from left to right on each line and then line by line until the required number of responses have been considered. The remaining responses should not then be marked. Examiners will have to apply judgement as to whether a 'second response' on a line is a development of the 'first response', rather than a separate, discrete response. *(The underlying assumption is that the candidate is attempting to hedge their bets and therefore getting undue benefit rather than engaging with the question and giving the most relevant/correct responses.)*

Short Answer Questions (requiring a more developed response, worth **two or more marks**)

If the candidates are required to provide a description of, say, three items or factors and four items or factors are provided, then mark on a similar basis – that is downwards (as it is unlikely in this situation that a candidate will provide more than one response in each section of the response space.)

Longer Answer Questions (requiring a developed response)

Where candidates have provided two (or more) responses to a medium or high tariff question which only required a single (developed) response and not crossed out the first response, then only the first response should be marked. Examiners will need to apply professional

judgement as to whether the second (or a subsequent) response is a 'new start' or simply a poorly expressed continuation of the first response.

6. Always check the pages (and additional objects if present) at the end of the response in case any answers have been continued there. If the candidate has continued an answer there, then add a tick to confirm that the work has been seen.
7. Award No Response (NR) if:
  - there is nothing written in the answer space

Award Zero '0' if:

- anything is written in the answer space and is not worthy of credit (this includes text and symbols).

Team Leaders must confirm the correct use of the NR button with their markers before live marking commences and should check this when reviewing scripts.

8. The RM Assessor **comments box** is used by your team leader to explain the marking of the practice responses. Please refer to these comments when checking your practice responses. **Do not use the comments box for any other reason.** If you have any questions or comments for your team leader, use the phone, the RM Assessor messaging system, or e-mail.
9. *Assistant Examiners will send a brief report on the performance of candidates to their Team Leader (Supervisor) via email by the end of the marking period. The report should contain notes on particular strengths displayed as well as common errors or weaknesses. Constructive criticism of the question paper/mark scheme is also appreciated.*

10. **For answers marked by levels of response:**

Read through the whole answer from start to finish, using the Level descriptors to help you decide whether it is a strong or weak answer. The indicative scientific content in the Guidance column indicates the expected parameters for candidates' answers, but be prepared to recognise and credit unexpected approaches where they show relevance. Using a 'best-fit' approach based on the skills and science content evidenced within the answer, first decide which set of level descriptors, Level 1, Level 2 or Level 3, best describes the overall quality of the answer.

Once the level is located, award the higher or lower mark:

**The higher mark** should be awarded where the level descriptor has been evidenced and all aspects of the communication statement (in *italics*) have been met.

**The lower mark** should be awarded where the level descriptor has been evidenced but aspects of the communication statement (in *italics*) are missing.

**In summary:**

**The skills and science content determines the level.**

**The communication statement determines the mark within a level.**

Level of response questions on this paper are **2(a)(ii)** and **4(c)**.

## 11. Annotations available in RM Assessor

**Marking Annotations**

Annotation	Use
	Benefit of Doubt
	Contradiction
	Cross
	Error Carried Forward
	Given Mark
	Extendable horizontal wavy line (to indicate errors / incorrect science terminology)
	Ignore
	Large dot (various uses as defined in mark scheme)
	Highlight (various uses as defined in mark scheme)
	Benefit of the doubt not given
	Tick
	Omission Mark
	Blank Page
	Level 1 answer in Level of Response question
	Level 2 answer in Level of Response question
	Level 3 answer in Level of Response question

12. Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
✓	Separates marking points
<b>DO NOT ALLOW</b>	Answers which are not worthy of credit
<b>IGNORE</b>	Statements which are irrelevant
<b>ALLOW</b>	Answers that can be accepted
( )	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
<b>ECF</b>	Error carried forward
<b>AW</b>	Alternative wording
<b>ORA</b>	Or reverse argument

### 13. Subject-specific Marking Instructions

#### INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

Question			Answer	Marks	Guidance																																
1	(a)	(i)	non-random / systematic ✓	1

Question			Answer	Marks	Guidance
			5 specifies type of cells / states <u>cheek</u> cells / specimen is named ✓		5 <b>IGNORE</b> has a title unqualified
	(c)	(i)	<p><i>Compared to light microscope</i></p> <p>1 nuclear pore / nuclear envelope / vesicle / golgi apparatus, are visible ✓</p> <p>2 high(er) magnification / mag is x100 000 ✓</p> <p><i>Compared to scanning EM</i></p> <p>3 image is 2D ✓</p>	max 2	<p><b>IGNORE</b> ref to image being black and white</p> <p><b>IGNORE</b> ref to resolution</p> <p>1 <b>IGNORE</b> any other named organelle</p> <p>3 <b>ALLOW</b> image is not 3D as with a SEM</p>
		(ii)	<p>1 proteins are synthesised / translation occurs, on the ribosomes (of RER) ✓</p> <p>2 proteins then pass into, lumen / cisternae (of RER) ✓</p> <p>3 proteins can, fold / have carbohydrate added ✓</p> <p>4 (proteins) are packaged into, <u>transport</u> vesicles ✓</p> <p>5 (transport) vesicles move to Golgi by microtubules ✓</p> <p>6 vesicles fuse with <u>cis</u> face of Golgi ✓</p>	max 4	<p><b>ALLOW</b> RER for rough endoplasmic reticulum throughout</p> <p>4 <b>ALLOW</b> <u>transport</u> vesicles carry protein to the Golgi (from RER)</p> <p>5 <b>ALLOW</b> cytoskeleton for 'microtubules'</p> <p>5 <b>DO NOT ALLOW</b> vesicles moving to SER from RER (then Golgi)</p>

Question			Answer	Marks	Guidance
			7 proteins are modified in Golgi and packaged into, (secretory) vesicles ✓		7 <b>ALLOW</b> proteins are processed for 'proteins are modified' 7 <b>DO NOT ALLOW</b> proteins packaged as vesicles for 'packaged into vesicles'
		(iii)	requires, energy / ATP ✓	1	<b>DO NOT ALLOW</b> in context of diffusion
	(d)		1 provides <u>mechanical strength</u> to the cell ✓  2 holds organelles in place ✓  3 aids transport of, (named) molecules / (named) organelles (within the cell) ✓  4 cell movement ✓  5 maintains cell, shape / structure / integrity / stability ✓  6 (role in) cell division / cytokinesis / spindle fibres ✓	max 3	<b>ALLOW</b> microtubules / microfilaments for 'cytoskeleton' context
			<b>Total</b>	<b>16</b>	

Question			Answer	Marks	Guidance												
6	(a)	(i)	amine ✓ carboxyl ✓	2	<b>IGNORE</b> structural / molecular, formulae <b>ALLOW</b> amino for 'amine' <b>ALLOW</b> carboxylic acid (group) for 'carboxyl'												
		(ii)	circle drawn completely around bond between C=O <b>AND</b> the N-H ✓	1	<b>ALLOW</b> circle to encompass C=O <b>AND</b> the N-H <b>IGNORE</b> circle line <b>on part of</b> the bonds immediately before and after C=O <b>AND</b> the N-H												
		(iii)	<u>hydrolysis</u> ✓	1													
	(b)		<table><tr><th>Statement</th><th>True</th><th>False</th></tr><tr><td>Breaking one ester bond in a triglyceride produces glycerol and three fatty acids.</td><td></td><td>✓</td></tr><tr><td>Ribose is a hexose monosaccharide.</td><td></td><td>✓</td></tr><tr><td>In an alpha glucose molecule, the hydroxyl (OH) group is positioned below carbon 1.</td><td>✓</td><td></td></tr></table> <p>All 3 rows correct ✓✓ Any 2 rows correct ✓</p>	Statement	True	False	Breaking one ester bond in a triglyceride produces glycerol and three fatty acids.		✓	Ribose is a hexose monosaccharide.		✓	In an alpha glucose molecule, the hydroxyl (OH) group is positioned below carbon 1.	✓		2	<b>ALLOW</b> a cross in place of a tick
Statement	True	False															
Breaking one ester bond in a triglyceride produces glycerol and three fatty acids.		✓															
Ribose is a hexose monosaccharide.		✓															
In an alpha glucose molecule, the hydroxyl (OH) group is positioned below carbon 1.	✓																
			<b>Total</b>	<b>6</b>													

## Need to get in touch?

If you ever have any questions about OCR qualifications or services (including administration, logistics and teaching) please feel free to get in touch with our customer support centre.

UNIVERSITY PRESS & ASSESSMENT

OCR is part of Cambridge University Press & Assessment, a department of the University of Cambridge.

For staff training purposes and as part of our quality assurance programme your call may be recorded or monitored. © OCR 2024 Oxford Cambridge and RSA Examinations is a Company Limited by Guarantee. Registered in England. Registered office The Triangle Building, Shaftesbury Road, Cambridge, CB2 8EA.

Registered company number 3484466. OCR is an exempt charity.

OCR operates academic and vocational qualifications regulated by Ofqual, Qualifications Wales and CCEA as listed in their qualifications registers including A Levels, GCSEs, Cambridge Technicals and Cambridge Nationals.

OCR provides resources to help you deliver our qualifications. These resources do not represent any particular teaching method we expect you to use. We update our resources regularly and aim to make sure content is accurate but please check the OCR website so that you have the most up-to-date version. OCR cannot be held responsible for any errors or omissions in these resources.

Though we make every effort to check our resources, there may be contradictions between published support and the specification, so it is important that you always use information in the latest specification. We indicate any specification changes within the document itself, change the version number and provide a summary of the changes. If you do notice a discrepancy between the specification and a resource, please [contact us](#).

Whether you already offer OCR qualifications, are new to OCR or are thinking about switching, you can request more information using our [Expression of Interest form](#).

Please [get in touch](#) if you want to discuss the accessibility of resources we offer to support you in delivering our qualifications.
