Extract 1
UK Employment and Unemployment

The unemployment rate has fluctuated with changes in economic growth.

Due to family demands, workers are often unable to move to another area to find work, leading to regional differences in unemployment. A lack of investment in manufacturing industries and in services reduces job opportunities, which results in long-term, structural unemployment and a fall in living standards. Depressed regions with high unemployment suffer from a lack of demand that leads to shops closing and more unemployment and economically inactive people. Both groups need to be supported with social security benefits.

As long as these unemployed people do not lose their skills, employers may be able to offer lower wages because of the surplus labour. To reduce unemployment the government may offer training in new technologies and better infrastructure, such as improved public transport.

Workforce data: 2022

Extract 2
Income Distribution and Taxes in Indonesia

#### Distribution of net income in Indonesia

Governments often use direct taxes not only to increase revenue, but also to redistribute income and wealth. Progressive income taxes charge a higher tax rate on higher incomes, while other taxes reduce increases in wealth. The distribution of wealth is more unequal than income. Holding wealth in the form of savings or other assets, such as houses, contributes to a more unequal income distribution, because of interest payments and capital gains. Wide differences in income and wealth are often associated with issues such as inequality of opportunities.

Income taxes can be used for public services and for providing social security benefits. Taxation is also used in both fiscal and supply side policies. A change in taxation policy affects disposable income and business profits, which results in a significant impact on economic growth and on inflation.

(a) Using Extract 2, calculate the percentage of total net income in 2021 that is received by the richest 40% of the Indonesian population. Show your working.

	Answer [2]
(b)	Using Extract 2, explain how the distribution of income in Indonesia has changed from 2002 to 2021.

Economic Policies and the Value of the Pound

Supply side spending (selected items) (£ billion)			
Government spending	2001–02	2011–12	2021–22
General public services	44.0	76.8	108.6
Health (NHS)	59.8	121.3	216.8
Education	51.2	86.5	100.3
Sum of excluded items	155.0	284.6	425.7
Total government spending	384.0	675.5	952.3

Government spending on education and health provision allows workers to become more productive, potentially increasing economic output.

When tax revenue does not increase at the same pace as government spending, the government must borrow to cover its deficit. When government borrowing increases, interest rates may rise. Monetary policy uses interest rates to affect economic growth through their effect on borrowing for investment and consumption.

When interest rates in the UK are higher than overseas, the international value of the pound increases, which may adversely affect UK exports, but should lower the inflation rate.

(a)	Using Extract 3, calculate the average amount, in £ billions, spent each year on total government
	spending over the period shown in the table.

	Answer	[2]
(b)	Explain how an increase in spending on education can lead to a rise in the rate of economic growth.
