

Cambridge Technicals

Applied Science

Unit 2: Laboratory techniques

Level 3 Cambridge Technical in Applied Science

05847 – 05849, 05874 & 05879

Mark Scheme for January 2025

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2025

MARKING INSTRUCTIONS**PREPARATION FOR MARKING****RM ASSESSOR**

1. Make sure that you have accessed and completed the relevant training packages for on-screen marking: *RM Assessor Online Training: OCR Essential Guide to Marking*.
2. Make sure that you have read and understood the mark scheme and the question paper for this unit. These are available in RM Assessor
3. Log-in to RM Assessor and mark the **required number** of practice responses (“scripts”) and the **required number** of standardisation responses.

MARKING

1. Mark strictly to the mark scheme.
2. Marks awarded must relate directly to the marking criteria.
3. The schedule of dates is very important. It is essential that you meet the RM Assessor 50% and 100% (traditional 40% Batch 1 and 100% Batch 2) deadlines. If you experience problems, you must contact your Team Leader (Supervisor) without delay.
4. If you are in any doubt about applying the mark scheme, consult your Team Leader by telephone, email or via the RM Assessor messaging system.

5. Crossed-Out Responses

Where a candidate has crossed out a response and provided a clear alternative then the crossed-out response is not marked. Where no alternative response has been provided, examiners may give candidates the benefit of the doubt and mark the crossed-out response where legible.

Rubric Error Responses – Optional Questions

Where candidates have a choice of question across a whole paper or a whole section and have provided more answers than required, then all responses are marked and the highest mark allowable within the rubric is given. Enter a mark for each question answered into RM Assessor, which will select the highest mark from those awarded. *(The underlying assumption is that the candidate has penalised themselves by attempting more questions than necessary in the time allowed.)*

Multiple-Choice Question Responses

When a multiple-choice question has only a single, correct response and a candidate provides two responses (even if one of these responses is correct), then no mark should be awarded (as it is not possible to determine which was the first response selected by the candidate). *When a question requires candidates to select more than one option/multiple options, then local marking arrangements need to ensure consistency of approach.*

Contradictory Responses

When a candidate provides contradictory responses, then no mark should be awarded, even if one of the answers is correct.

Short Answer Questions (requiring only a list by way of a response, usually worth only one mark per response)

Where candidates are required to provide a set number of short answer responses then only the set number of responses should be marked. The response space should be marked from left to right on each line and then line by line until the required number of responses have been considered. The remaining responses should not then be marked. Examiners will have to apply judgement as to whether a 'second response' on a line is a development of the 'first response', rather than a separate, discrete response. *(The underlying assumption is that the candidate is attempting to hedge their bets and therefore getting undue benefit rather than engaging with the question and giving the most relevant/correct responses.)*

Short Answer Questions (requiring a more developed response, worth two or more marks)

If the candidates are required to provide a description of, say, three items or factors and four items or factors are provided, then mark on a similar basis – that is downwards (as it is unlikely in this situation that a candidate will provide more than one response in each section of the response space).

Longer Answer Questions (requiring a developed response)

Where candidates have provided two (or more) responses to a medium or high tariff question which only required a single (developed) response and not crossed out the first response, then only the first response should be marked. Examiners will need to apply professional judgement as to whether the second (or a subsequent) response is a 'new start' or simply a poorly expressed continuation of the first response.

6. Always check the pages (and additional objects if present) at the end of the response in case any answers have been continued there. If the candidate has continued an answer there, then add the annotation 'SEEN' to confirm that the work has been seen and mark any responses using the annotations in section 11.
7. There is a NR (**No Response**) option. Award NR (No Response):
 - if there is nothing written at all in the answer space
 - OR if there is a comment which does not in any way relate to the question (e.g., 'can't do', 'don't know')
 - OR if there is a mark (e.g., a dash, a question mark) which is not an attempt at the question.

Note: Award 0 marks – for an attempt that earns no credit (including copying out the question).

8. The RM Assessor **comments box** is used by your Team Leader to explain the marking of the practice responses. Please refer to these comments when checking your practice responses. **Do not use the comments box for any other reason.**
9. Assistant Examiners will send a brief report on the performance of candidates to their Team Leader (Supervisor) via email by the end of the marking period. The report should contain notes on particular strengths displayed as well as common errors or weaknesses. Constructive criticism of the question paper/mark scheme is also appreciated.

10. For answers marked by levels of response:

To determine the level – start at the highest level and work down until you reach the level that matches the answer

To determine the mark within the level, consider the following

| Descriptor | Award mark |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|
| On the borderline of this level and the one below | At bottom of level |
| Just enough achievement on balance for this level | Above bottom and either below middle or at middle of level (depending on number of marks available) |
| Meets the criteria but with some slight inconsistency | Above middle and either below top of level or at middle of level (depending on number of marks available) |
| Consistently meets the criteria for this level | At top of level |

11. Annotations available in RM Assessor

| Annotation | Meaning |
|-------------------------------------------------------------------------------------|----------------------------------------|
|  | Correct response |
|  | Incorrect response |
|  | Omission mark |
|  | Benefit of doubt given |
|  | Contradiction |
|  | Rounding error |
|  | Error in number of significant figures |
|  | Error carried forward |
|  | Level 1 |
|  | Level 2 |
|  | Level 3 |
|  | Benefit of doubt not given |
|  | Noted but no credit given |
|  | Ignore |

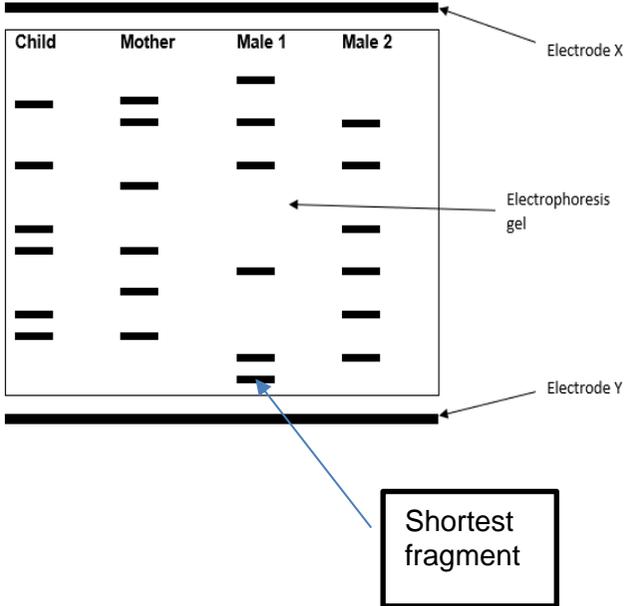

12. Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

| Annotation | Meaning |
|---------------------|---------------------------------------------------------------|
| / | alternative and acceptable answers for the same marking point |
| DO NOT ALLOW | Answers which are not worthy of credit |
| IGNORE | Statements which are irrelevant |
| ALLOW | Answers that can be accepted |
| () | Words which are not essential to gain credit |
| — | Underlined words must be present in answer to score a mark |
| ECF | Error carried forward |
| AW | Alternative wording |
| ORA | Or reverse argument |

| Question | | | Answer | Marks | Guidance |
|----------|-----|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|------------------------------------------------------------------------------------------------------------------|
| 1 | (a) | (i) | Any three from: <ul style="list-style-type: none"> • (Specify) volume/mass of water used • (Specify) pressures of gas used • Repeats • (Specify) the type of timer ✓✓✓ | 3 | ALLOW angle of launcher ALLOW measurements of water/ how much water used ALLOW amount |
| | | (ii) | <ul style="list-style-type: none"> • Being hit by the rocket / bottle ✓ • The rocket / bottle / gas /pump exploding✓ | 2 | ALLOW response in either order IGNORE risks related to water |
| | | (iii) | Any two from: <ul style="list-style-type: none"> • Wear safety glasses / goggles / face shield • Wear safety helmet • Do not point the rocket at anyone when it is fired • Use a (safety) screen when the rocket is pressurised • Keep a safe distance (around the firing / landing area) ✓✓ | 2 | IGNORE glasses IGNORE gloves / PPE |

|----------------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|--------------------|--------------------|--------------------|-------------------|
| | (b) | <p>Any four from:</p> <ul style="list-style-type: none"> • Pressure AND Time columns ✓ • Units : pressure in kPa AND time/s ✓ • Columns for the repeats ✓ • Column for average / mean time value ✓ • Additional rows for data to be recorded ✓ | 4 | <table border="1"> <tr> <td>Pressure / kPa</td> <td>Time / s Test 1</td> <td>Time / s Test 2</td> <td>Time / m Test 3</td> <td>Average time/s</td> </tr> </table> <p>IGNORE units not in column headings</p> <p>ALLOW Kpa ALLOW 2 repeats IGNORE average of other measurements</p> <p>IGNORE column headed quantity of water IGNORE units for average If no table drawn award one mark for pressure kPa and time s</p> | Pressure / kPa | Time / s Test 1 | Time / s Test 2 | Time / m Test 3 | Average time/s |
| Pressure / kPa | Time / s Test 1 | Time / s Test 2 | Time / m Test 3 | Average time/s | | | | | |
| | (c) | <p>A scatter graph is more appropriate because the x axis values are /data is continuous. OR A bar chart is used when the x axis values are not continuous ✓</p> | 1 | <p>ALLOW allows for a line of best fit ALLOW allows for estimation between points</p> | | | | | |
| | (d) | <ul style="list-style-type: none"> • The <u>higher</u> the pressure ✓ • The <u>longer</u> the rocket stays in the air ✓ • The relationship is non- linear ✓ <p>OR</p> <ul style="list-style-type: none"> • The <u>lower</u> the pressure ✓ • The <u>less</u> time the rocket stays in the air ✓ • The relationship is non- linear ✓ | 3 | <p>ALLOW responses in any order ALLOW the more air in the bottle</p> <p>IGNORE positive correlation IGNORE data</p> | | | | | |

| Question | | | Answer | Marks | Guidance |
|----------|-----|------|----------------------------------------------------------------------------------------------------------------------------------------------------|-------|----------------------------------------------------------------------------------------------------------|
| 2 | (a) | (i) | Polymerase chain reaction ✓ | 1 | ALLOW phonetic spellings of polymerase DO NOT ALLOW polymer /polymerised / polymerising |
| | | (ii) | Any two from: A small/tiny sample of cells/tissue used ✓ Amplify (the number of copies of DNA/genes) ✓ (Amplify) DNA / genes ✓ | 2 | OWTTE ALLOW make more copies DO NOT ALLOW RNA |
| | (b) | (i) | Negative – negative ✓ | 1 | |
| | | (ii) | Adenine – thymine ✓ | 1 | |

| Question | Answer | Marks | Guidance |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|--------------------------------------------------------------|
| (iii) |  <p>Correct Label ✓ The shortest fragment travels the furthest ✓</p> | 2 | <p>ALLOW shortest fragment travels faster/fastest</p> |

| Question | | Answer | Marks | Guidance |
|----------|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | (iv) | <p>Most likely father:</p> <p>Male 2 ✓</p> <p>Explanation:</p> <p>the child has three fragments/bands which are the same as <u>three</u> of the mother's ✓</p> <p>And <u>three</u> fragments/bands which are the same as male 2 ✓</p> | 3 | <p>ALLOW a diagram that shows 3 matches to mother</p> <p>ALLOW a diagram that shows 3 matches to male 2</p> <p>ALLOW only 1 fragment matches with male 1</p> <p>IGNORE child shares half DNA with male 2</p> |
| | (c) | <p>Any one from: ✓</p> <ul style="list-style-type: none"> • Forensic science / (collecting and analysing DNA from a crime scene) • Diagnosis of genetic diseases (OR a named disease eg Cystic fibrosis, Huntingdon's disease) • Identification of dead bodies • Organ transplants • GM crops • Tracking family history • Virus/pathogen (identification) • Identification of species or genomics | 1 | <p>ALLOW Covid or coronavirus (test)</p> <p>DO NOT ALLOW finger fingerprint identification</p> <p>IGNORE crime investigation</p> <p>IGNORE paternity test</p> |
| | (d) (i) | <p>Run a GC of pure pentan-1-ol or pure pentan-3-ol ✓</p> <p>Compare the retention time of the known pure alcohol with the retention times on the spectrum ✓</p> | 2 | <p>ALLOW run the two alcohols separately</p> <p>IGNORE peak</p> |
| | (ii) | Measure the relative peak area ✓ | 1 | ALLOW relative peak heights |

| Question | | | Answer | Marks | Guidance |
|----------|-----|-------|-----------------------------------------------------------------------------------------------------------------------------------------|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3 | (a) | (i) | Na = 23.0 O=16.0 H= 1.0 / 23.0 +16.0 +1.0 = (40.0 g mol ⁻¹) | 1 | ALLOW in any order |
| | | (ii) | (0.025 / 4) = 0.00625 (mol) OR 6.25 x 10 ⁻³ ✓ | 1 | |
| | | (iii) | Mass = 3(a)(ii) x 40.0 = ✓ = 0.250 (g) ✓ | 2 | ALLOW mass = 0.25 g ECF from 3(a)(ii) |
| | | (iv) | Volumetric flask ✓ | 1 | IGNORE size of flask |
| | (b) | (i) | A: Burette✓ B: <u>Conical</u> flask✓ | 2 | DO NOT ALLOW biuret ALLOW only correct responses at lines A and B, unless shown correctly on the diagram. |
| | | (ii) | Colourless TO pink ✓ | 1 | Both colourless and pink required for the mark. IGNORE clear DO NOT ALLOW other colours |
| | | (iii) | The titration is between a weak acid and a strong alkali OR methyl orange is used to titrate a strong acid with a weak alkali. ✓ | 1 | ALLOW initial pH of oil too high to show colour change ALLOW base for alkali IGNORE methyl orange's colour change at end point difficult to accurately spot against background colour of oil |
| | | (iv) | Ring(s) around three values (20.15, 20.10 AND 20.15) but NOT 20.30 | 1 | |

| Question | Answer | Marks | Guidance |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| (v) | <p>FIRST CHECK ANSWER ON ANSWER LINE If answer = 20.13 award 2 marks</p> <p>Correct calculation of mean using their values from 3(b)(iv) ✓</p> <p>Their answer given to 2dp ✓</p> | 2 | <p>ALLOW ecf 3(b)(iv)</p> <p>ALLOW ecf mp1</p> <p>ALLOW MP 1 calculation answer = 20.14 if working shown for first mp only</p> |
| (vi) | <p>If answer = 5.0325×10^{-4} award 1 mark $0.025 \times \mathbf{3(b)(v)} / 1000 = 5.0325 \times 10^{-4}$ ✓</p> | 1 | <p>ALLOW 5.03×10^{-4} to 5.033×10^{-4}</p> <p>ALLOW ecf 3(b)(v)</p> <p>ALLOW answers not in standard form</p> |
| (c) | <p>FIRST CHECK ANSWER ON ANSWER LINE If answer = 40.3 g award 4 marks</p> <p>Number of moles NaOH required to neutralise $1 \text{ dm}^3 =$ $0.00050325 \times 1000/10 = 0.050325$ ✓</p> <p>Number of moles NaOH required to neutralise $20 \text{ dm}^3 =$ $0.050325 \times 20 = 1.0065$ ✓</p> <p>Mass NaOH = $1.0065 \times 40 = 40.26 \text{ g}$ ✓</p> <p>= 40.3 g (3sf) ✓</p> | 4 | <p>ALLOW ecf for mean titre from 3(b)(vi)</p> <p>ALLOW ecf throughout</p> <p>ALLOW up to maximum marks if multiplied at any stage by 6 to gain final answer.</p> |

OCR is part of Cambridge University Press & Assessment, a department of the University of Cambridge. For staff training purposes and as part of our quality assurance programme your call may be recorded or monitored. © OCR 2025 Oxford Cambridge and RSA Examinations is a Company Limited by Guarantee. Registered in England. Registered office The Triangle Building, Shaftesbury Road, Cambridge, CB2 8EA. Registered company number 3484466. OCR is an exempt charity.

OCR operates academic and vocational qualifications regulated by Ofqual, Qualifications Wales and CCEA as listed in their qualifications registers including A Levels, GCSEs, Cambridge Technicals and Cambridge Nationals.

OCR provides resources to help you deliver our qualifications. These resources do not represent any particular teaching method we expect you to use. We update our resources regularly and aim to make sure content is accurate but please check the OCR website so that you have the most up-to-date version. OCR cannot be held responsible for any errors or omissions in these resources.

Though we make every effort to check our resources, there may be contradictions between published support and the specification, so it is important that you always use information in the latest specification. We indicate any specification changes within the document itself, change the version number and provide a summary of the changes. If you do notice a discrepancy between the specification and a resource, please [contact us](#).

Whether you already offer OCR qualifications, are new to OCR or are thinking about switching, you can request more information using our [Expression of Interest form](#).

Please [get in touch](#) if you want to discuss the accessibility of resources we offer to support you in delivering our qualifications.
