H081/01 Landscape and place

Resource Booklet

**Time allowed: 1 hour 45 minutes
plus your additional time allowance**

INSTRUCTIONS

**Do NOT send this Resource Booklet for marking. Keep it
in the centre or recycle it.**

FIG. 1 – Coastal landscape in Wales

FIG. 1 is a photograph of a stretch of coast in an upland area. There is a wide, sweeping bay backed by high cliffs; there is also the mouth of an estuary with a curved spit. In the distance the high cliffs are not vertical but slope down to the sea at a steep angle. Nearer the mouth of the estuary the cliffs slope down to the low, flat land which is part of the spit. The spit has been colonised by vegetation. Waves are shown along the entire length of the spit. In the foreground on the near side of the estuary there is a small settlement and harbour protected by a sea wall. Sand has accumulated behind the sea wall.

FIG. 2 – Glaciated landscape in Canada

FIG. 2 is a photograph of an upland glaciated area. In the background there are high mountains with sharp angular peaks; they have steep slopes of bare rock. The highest slopes are snow and ice covered. Small glaciers descend in the valleys between the peaks but these do not reach the main valley floor. At the base of the mountains, at the side of the main valley, there is a long ridge of bare loose rock. In the foreground the main valley floor has an uneven, hummocky surface with patches of vegetation and sparsely distributed pine trees. A river flows through this main valley.

In the foreground the main valley floor has an uneven, hummocky surface with patches of vegetation and sparsely distributed pine trees. A river flows through this main valley.

FIG. 3 – Dryland landscape in Jordan

FIG. 3 is a photograph of a hot desert with a cloudless sky. It shows upland areas of bare rock and lowland areas of sand and dunes. The entire area is red in colour; there is very little vegetation. In the foreground flakes of rock are peeling away parallel to the surface of a large solid rock. In the background is an inselberg. This is a very large almost vertical rock of varying heights with pillar-like appearance; rock debris forms slopes at its base. On the lower ground are large quantities of sand; some areas are relatively flat with small sand ripples, other areas are more uneven and include a barchan dune.

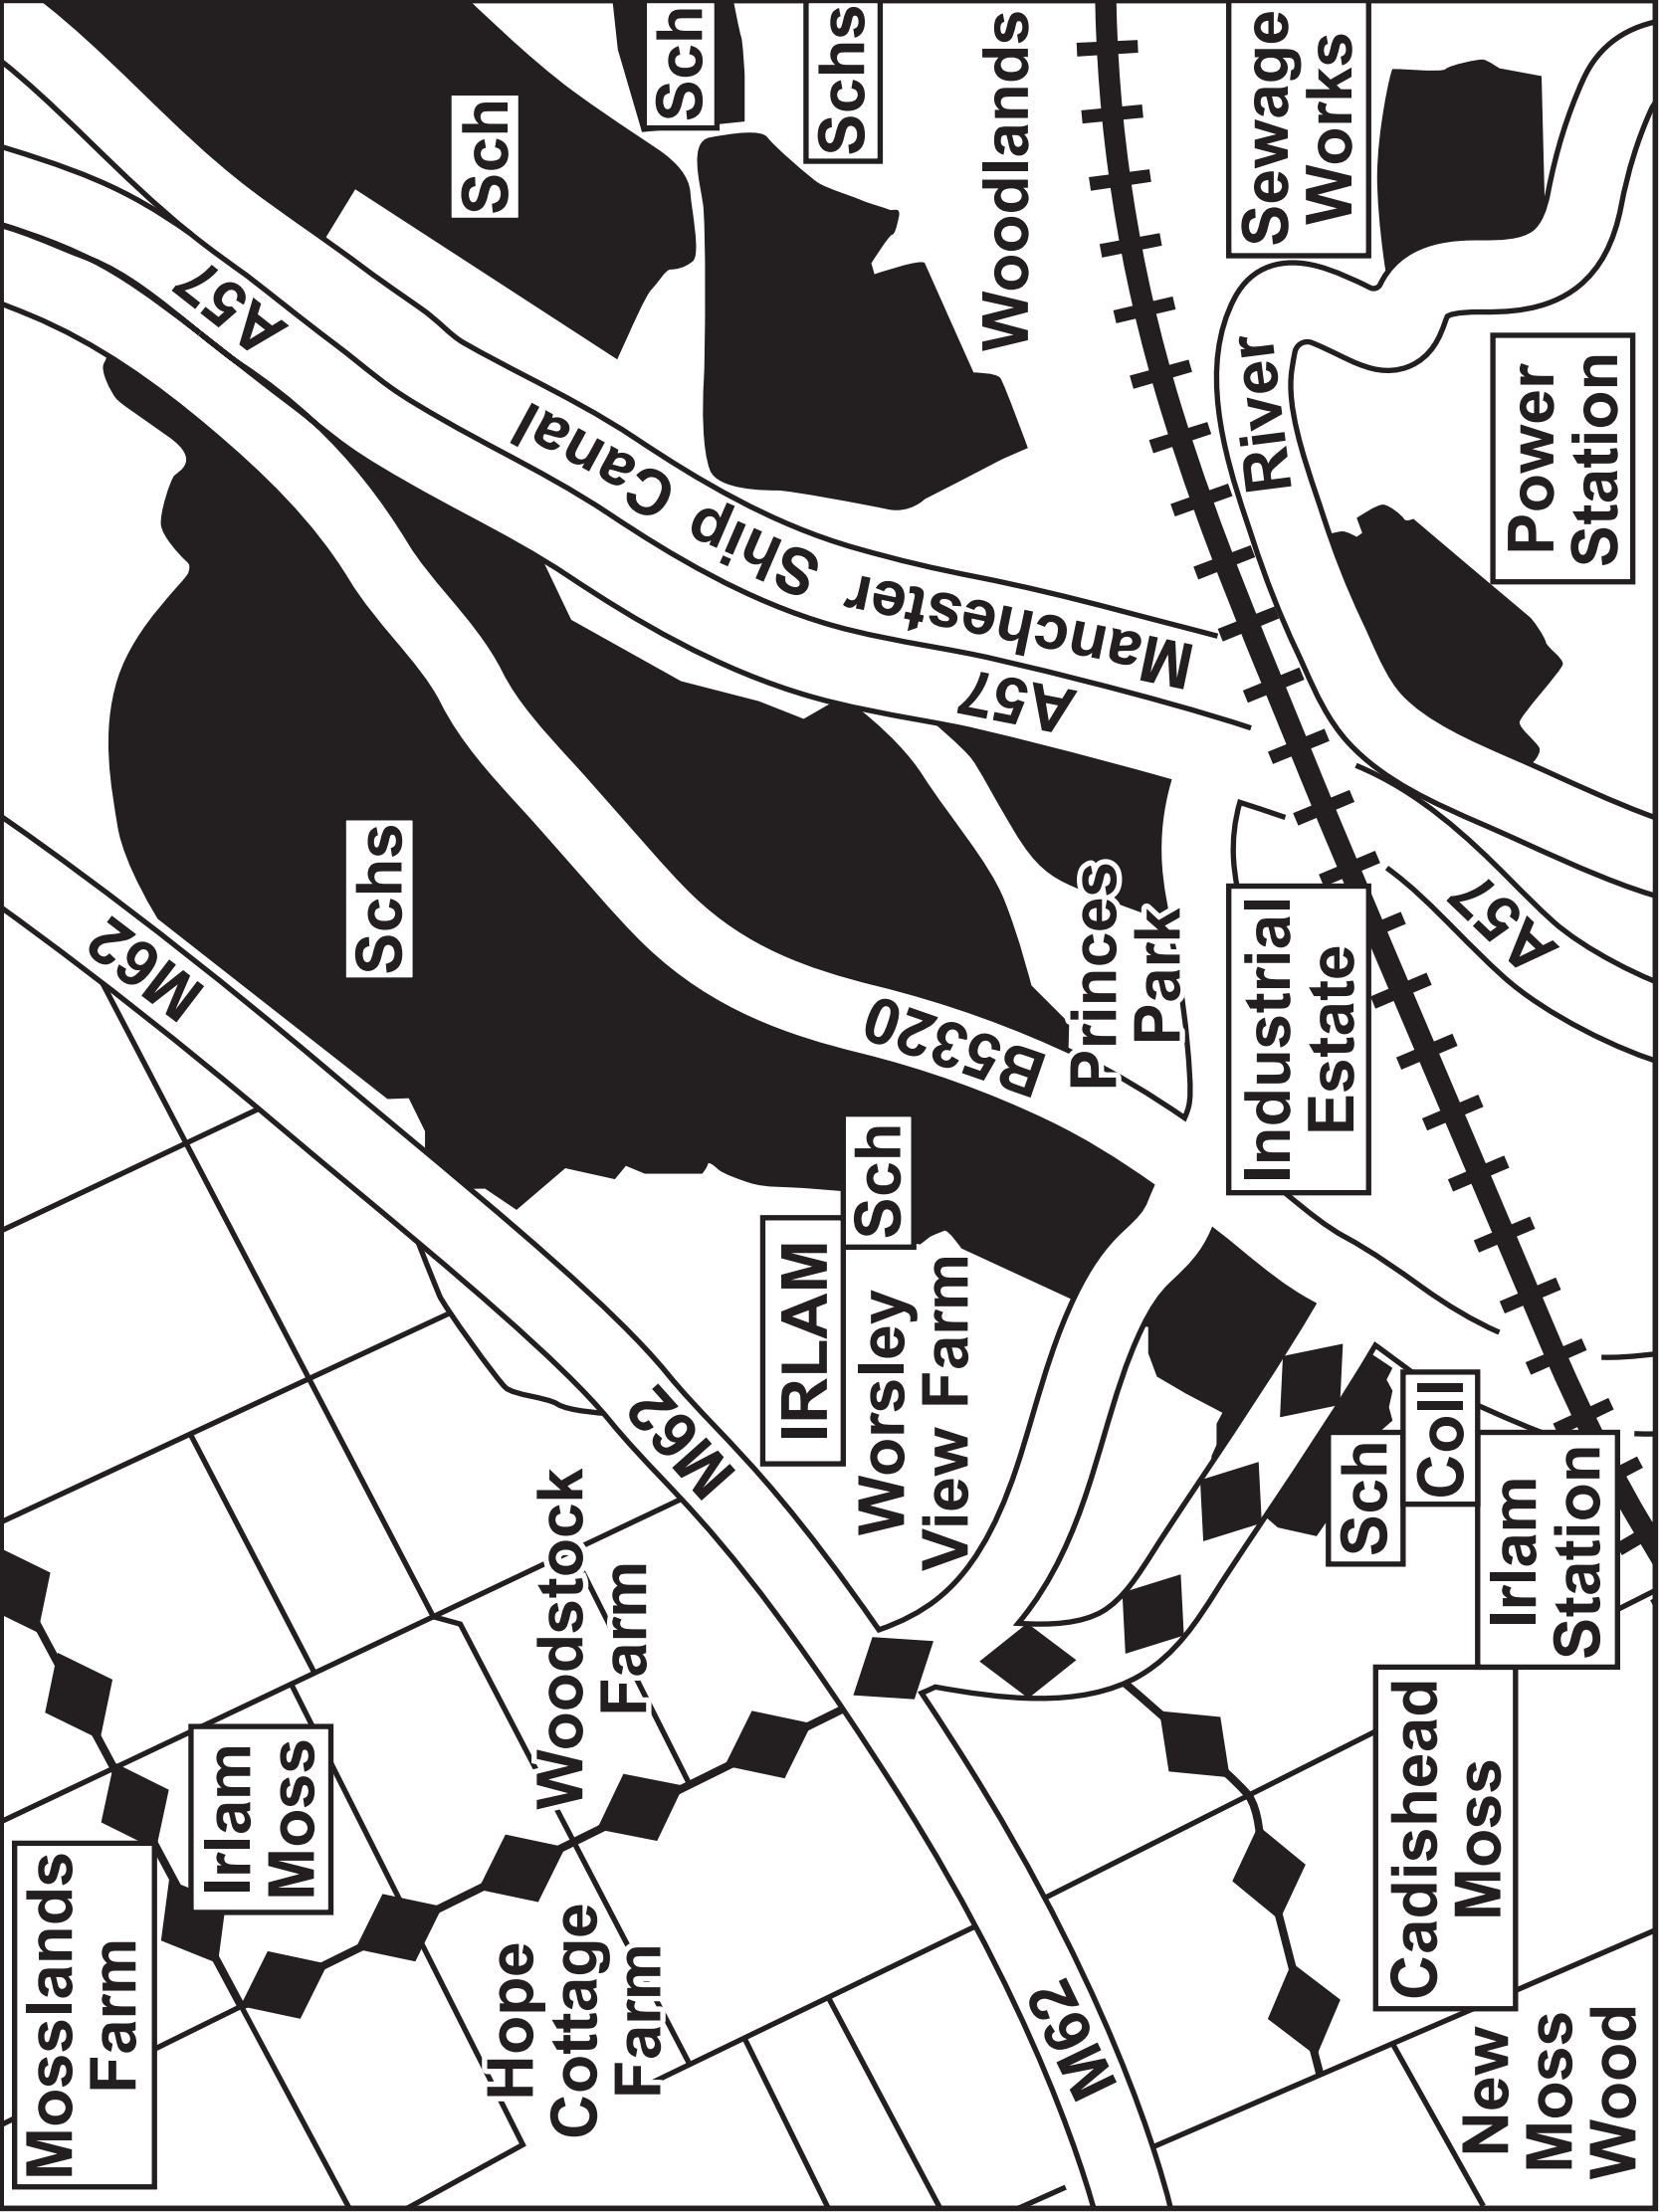

FIG. 4A – Government health spending per person for selected countries, 2021

Region	Country	Government health spending per person (US\$ ppp)
Europe	Germany	5237.8
	Italy	2527.7
	Norway	7717.9
	Romania	728.5
	UK	4802.5
Sub-Saharan Africa	Democratic Republic of the Congo	3.7
	Ethiopia	8.1
	South Africa	352.5
	South Sudan	5.2
	Mali	11.8

FIG. 4B – OS 1:25 000 map extract of Irlam, City of Salford, Greater Manchester
