

Modified Enlarged 24pt
OXFORD CAMBRIDGE AND RSA EXAMINATIONS

Wednesday 4 June 2025 – Morning

GCSE (9–1) Mathematics

J560/05 Paper 5 (Higher Tier)

**Time allowed: 1 hour 30 minutes
plus your additional time allowance**

YOU MUST HAVE:

**the Formulae Sheet for Higher Tier (with
this document)**

YOU CAN USE:

**geometrical instruments
tracing paper**

DO NOT USE:

a calculator

Please write clearly in black ink.

Centre number

First name(s)

Last name

READ INSTRUCTIONS OVERLEAF

INSTRUCTIONS

Use black ink. You can use an HB pencil, but only for graphs and diagrams.

Write your answer to each question in the space provided. If you need extra space use the lined pages at the end of this booklet. The question numbers must be clearly shown.

Answer ALL the questions.

Where appropriate, your answer should be supported with working. Marks might be given for using a correct method, even if your answer is wrong.

INFORMATION

The total mark for this paper is 100.

The marks for each question are shown in brackets [].

ADVICE

Read each question carefully before you start your answer.

BLANK PAGE

1 Work out.

(a) -3.5×-4

(a) _____ [1]

(b) $0.1 \div 0.4$

(b) _____ [1]

- 2 An examination has two parts.
A student scores 10 out of 15 marks on
Part 1.
They score 4 out of 10 marks on Part 2.**

**To pass the examination the student
needs to score 54% of the total marks.**

**Show that the student passes the
examination. Use the space below. [3]**

3 Triangle A and triangle B are drawn on the coordinate grid.

Describe fully the SINGLE transformation that maps triangle A onto triangle B.

[3]

4 (a) Solve.

$$4x \leq 20$$

(a) _____ [1]

(b) Show your solution to part (a) on the number line.

[2]

5 $1\frac{1}{5} + \frac{22}{d} = 1\frac{3}{4}$

Find the value of d .

$d = \frac{\quad}{9} \quad [3]$

- 6 Sara and Tom both make a sequence of numbers.
The first term in both sequences is 10.**

The term-to-term rule for Sara's sequence is add 14.

The term-to-term rule for Tom's sequence is add 35.

Each sequence stops when a term reaches or goes above 500.

- (a) Find the NUMBER OF TERMS that are the same in both Sara's and Tom's sequence.
You must show your working.**

(a) _____ [4]

(b) Find an expression for the n th term of Sara's sequence.

(b) _____ [2]

BLANK PAGE

7 The graph of the line $x + y = 3$ is shown on this grid.

(a) By drawing a suitable line on the grid, solve these simultaneous equations.

$$x + y = 3 \text{ and } y = 2x - 3$$

(a) $x =$ _____
 $y =$ _____
[4]

(b) Umi says,

The simultaneous equations $y = 2x + 3$ and $2y - 4x = 7$ will have no solutions.

Is Umi correct?
Explain how you decide.

Umi is _____ because _____
_____ [2]

**8 Three lengths of wood are in the ratio
2 : 5 : 7.**

**The difference in size between two of
the lengths of wood is 30 cm.**

Kofi says,

**The sum of the three lengths of wood
MUST BE at least 120 cm.**

Is Kofi correct?

Show how you decide.

Kofi is _____ because _____

_____ **[5]**

- 9 A school has three terms, Autumn, Spring and Summer.**

In class A there were 90 absences in the Autumn term, 120 absences in the Spring term and 40 absences in the Summer term.

Compared to class A, class B had:

**$\frac{3}{10}$ fewer absences in the Autumn term
5% more absences in the Spring term
7 more absences in the Summer term.**

Design and complete a two-way table to show this information. Use the space below. [6]

- 10 Heidi is x years old.
Finley is 5 years younger than Heidi.
Zayn is 4 times Finley's age.**

**Find an expression in terms of x for the
TOTAL age of Heidi, Finley and Zayn.
Write your answer as simply
as possible.**

BLANK PAGE

- 11 A solid steel cube has a mass of 1.05 kg.
The density of the steel is 7.9 g/cm^3 .**

Orla says,

The length of one side of the cube is approximately 10 cm.

**Use estimation to decide if Orla's statement is reasonable.
Show how you decide.**

Orla's statement is _____

because _____

_____ **[5]**

Not to scale

**ABC is an equilateral triangle.
BD is perpendicular to AC.**

**Prove that triangle ABD is congruent to
triangle CBD.**

[4]

- 13 p is directly proportional to the square root of m .
 $p = 15$ when $m = 25$.

Find the value of p when $m = 81$.

$$p = \underline{\hspace{10cm}} \quad [3]$$

14 (a) Find the value of $4^{\frac{5}{2}}$.

(a) _____ [2]

(b) Simplify.

$$(3x^2)^{-3} \times 9x^8$$

(b) _____ [4]

15 (a) Write $x^2 - 6x + 5$ in the form $(x - a)^2 - b$.

(a) _____ [3]

(b) Write down the coordinates of the turning point of $y = x^2 - 6x + 5$.

(b) (_____, _____) [2]

16 Rearrange this formula to make a the subject.

$$p = \frac{a + 2b}{3 - a}$$

[4]

- 17 The mass of some parcels are recorded. The table and the histogram each show part of this information.

Mass (m kg)	$0 < m \leq 2$	$2 < m \leq 5$	$5 < m \leq 10$	$10 < m \leq 20$
Frequency		12	18	

- (a) Complete the table and the histogram. [4]

(b) The heaviest parcel is 19.5 kg.

Complete the inequality to represent the range, R kg, of the masses of the parcels.

(b) ____ $\leq$ R < ____ [2]

18 Work out.

$$1.4\dot{2} \div 0.\dot{2}$$

Give your answer as a mixed number in its simplest form.

You must show your working.

- 19 The diagram shows a shape formed by a semicircle joined to a sector of a circle, BAC, along a common length AB.

Not to scale

The area of the sector BAC is $16\pi \text{ cm}^2$.

Work out the total area of the shape.
Give your answer in terms of π .
You must show your working.

20 Simplify.

$$\frac{x^2 - 36}{x^2 - x - 42}$$

BLANK PAGE

- 21 There are 10 sweets in a bag.
4 of the sweets are red, 4 are green and
2 are yellow.**

(a) Charlie says,

**The probability of picking the two
yellow sweets at random from
the bag can be found by working
out $\frac{2}{10} \times \frac{2}{10}$.**

**Write down the assumption that
Charlie has made.**

_____ **[1]**

- (b) Mia takes one of the 10 sweets from
the bag at random and eats it.
Ben then takes a sweet from the bag
and eats it.**

**Find the probability that the bag
now holds more red sweets than
green sweets.
You must show your working.**

[5]

- 22** The diagram shows a quadrilateral ABCD. DB is a diagonal of the quadrilateral.

Not to scale

**$AD = 5\text{ cm}$, $AB = 7\text{ cm}$ and $BC = 14\text{ cm}$.
Angle $DAB = x^\circ$ and angle $DBC = 45^\circ$.**

$\cos x^\circ = 0.8$ and $\sin x^\circ = 0.6$.

**Work out the area of triangle BDC.
You must show your working.**

_____ cm^2 [6]

END OF QUESTION PAPER

EXTRA ANSWER SPACE

If you need extra space use these lined pages. You must write the question numbers clearly in the margin.

Copyright Information

OCR is committed to seeking permission to reproduce all third-party content that it uses in its assessment materials. OCR has attempted to identify and contact all copyright holders whose work is used in this paper. To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced in the OCR Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download from our public website (www.ocr.org.uk) after the live examination series.

If OCR has unwittingly failed to correctly acknowledge or clear any third-party content in this assessment material, OCR will be happy to correct its mistake at the earliest possible opportunity.
