PLANNING AND PITCHING A PRINT-BASED MEDIA PRODUCT

D/504/0475

LEVEL 3

AIM OF THE UNIT

By completing this unit learners will understand print-based media products and the importance of research and planning to produce them. They will understand how to generate and select ideas for their own print-based media products, and pitch them to an editor, a client or a focus group. Learners will understand how to use feedback gained from their pitch to inform a production plan.
# ASSESSMENT AND GRADING CRITERIA

<table>
<thead>
<tr>
<th>Learning Outcome (LO)</th>
<th>Pass</th>
<th>Merit</th>
<th>Distinction</th>
</tr>
</thead>
<tbody>
<tr>
<td>The learner will:</td>
<td>The assessment criteria are the pass requirements for this unit.</td>
<td>To achieve a merit the evidence must show that, in addition to the pass criteria, the learner is able to:</td>
<td>To achieve a distinction the evidence must show that, in addition to the pass and merit criteria, the learner is able to:</td>
</tr>
</tbody>
</table>
| 1 Understand existing print-based media products and how they are created | P1 Learners select a print-based media product that they are interested in making and analyse similar existing products for the following:  
   a) purpose  
   b) form and style  
   c) content  
   d) meaning  
   e) genre  
   f) target audience  
   g) frequency  
   h) processes involved in its production | | |
| 2 Be able to generate ideas for an original print-based media product | P2 Learners generate appropriate ideas for an original print-based media product. They use their analysis of existing print-based media products to inform their ideas. | | |
| 3 Be able to develop ideas by creating proposals and sample materials for two original print-based products | P3 Learners select their two most appropriate ideas for original print-based products, and create the following for each idea:  
   a) a proposal containing: an outline of form, content and style; the product’s potential position in marketplace; a specified target audience  
   b) sample pre-production materials | M1 Learners create proposals for both ideas that have a good degree of feasibility and are appropriate for the needs of the specified target audience. The sample materials produced for both ideas are fit for purpose and generally of a good technical standard | D1 Learners create at least one treatment or proposal that suggests further development possibilities for their print-based product. Learners produce sample materials that have a high level of appeal and are generally of a high technical standard |
| 4 Be able to pitch ideas on proposed print-based products to an editor, client or focus group for feedback | P4 Learners pitch their ideas, proposals and sample pre-production materials for original print-based products to an editor, client or focus group for feedback | M2 Learners are able to deliver an effective pitch or presentation. The content of the pitch or presentation is detailed and relevant | |
| 5 Be able to use feedback gained to inform the development and planning of an original print-based media product | P5 Learners use the feedback gained from the editor, client or focus group to inform the development of one of their proposed ideas. They produce a competent production plan containing:  
   a) dates and timescales, including product launch date  
   b) resources and equipment  
   c) personnel and activities  
   d) budget  
   e) relevant legal and ethical issues | M3 Learners produce a detailed production plan. They take account of seasonal and calendar events when planning timescales and launch date. The timescales, launch date and budget are realistic and feasible for the product they are planning for | D2 Learners explain how they will resolve any relevant legal and ethical issues relating to their print-based product. Learners revise their pre-production materials based on the feedback they have received |
TEACHING CONTENT

The unit content describes what has to be taught to ensure that learners are able to access the highest grade.

Anything which follows an i.e. details what must be taught as part of that area of content.

Anything which follows an e.g. is illustrative, it should be noted that where e.g. is used, learners must know and be able to apply relevant examples to their work though these do not need to be the same ones specified in the unit content.

Understand existing print-based media products and how they are created

For example:
- entertain, educate, inform, sell products, promote brand
- tabloid, Berliner, broadsheets, e-magazine, magazines, handbag size
- news, features, media terminology (e.g. mastheads, by-lines), adverts, regular columns
- created through elements (e.g. colour, language, text, images)
- created through semiotics (e.g. denotation, connotation, signification, iconography, anchorage)
- created through techniques (e.g. cropping, sizing, use of captions, choice of fonts)
- fiction/non-fiction, special interest, gender-specific
- needs of audience/consumer, demographics, lifestyle
- daily, weekly, one-offs
- pre-production, production and post production processes.

Be able to generate ideas for an original print-based media product

For example:
- mood boards, summary of ideas, spider diagrams.

Be able to develop ideas by creating proposals and sample materials for two original print-based products

For example:
- Magazine, newspaper, website, print based advertisements, information pack, etc.
- proposal - title, format, content, i.e. news, features, fiction/non-fiction, advertisements etc., housestyle, frequency, similar products available, place in market (e.g. market leader, new product launched)
- needs of the target audience/consumer by age, gender, demographics lifestyle, interests, spending power etc.
- draft articles, draft layouts, plan for images needed, select fonts/graphics/colours, test photography, housestyle etc.

Be able to pitch ideas on proposed print-based products to an editor, client or focus group for feedback

For example:
- formal meeting, client meeting, written report, verbal presentation etc.
- proposal - title, format, content, target audience by age, gender, lifestyle, interests, spending power, how does the product appeal to target audience
- draft articles, draft layouts, mood boards, plan for images needed, select fonts, graphics, colours, housestyle etc.

Feedback should take the form of a written report, written or verbal response (supported with a witness statement). Questionnaires, audio-visual/audio recording, feedback form, online survey.

Be able to use feedback gained to inform the development and planning of an original print-based media product

For example consider:
- have needs/expectations been met for client brief/editor/ focus group
- client/editor/focus group likes/dislikes
- is the content correct (based on form and style).

Production plan i.e.:
- industry standard format
- materials, equipment, locations, contingency plans etc.
- personnel identifying key roles and tasks i.e. editor, writer, designer etc.
- budget including materials, equipment, personnel etc.
- copyright, intellectual, property rights, slander/libel, royalties, offensive language, public interest.
DELIVERY GUIDANCE

This unit is centre-assessed and externally moderated.

In order to achieve this unit, learners must produce a portfolio of evidence showing that they can meet all the pass grading criteria.

Portfolios of work must be produced independently. Portfolios put forward for moderation must be available for the OCR Visiting Moderator to access freely during the moderation visit, along with witness statements and any other necessary supporting documentation.

Centres must confirm to OCR that the evidence produced by learners is authentic.

In order to achieve this unit, learners must produce evidence that meets all the pass grading criteria. There are no other additional requirements for this unit.

Learners should gain knowledge, understanding and skills through practical tasks related to their own productions as well as professional produced media products. This unit can be linked with the other mandatory unit 01, this unit prepares the learner for the production work they could do in unit 14, 15, 32, 34.

If working as a team, learners should ensure that they have identified their contribution to the planning and execution of any task involving teamwork. If learners are working as a team this presents the opportunity for individuals to draw on their strengths and also to develop new skills.

Centres could approach this unit as a client brief in order to give their learners a clear understanding as to the approach required in order to satisfy the client’s requirements for the final product.

P1: Learners should be taught the principles of textual analysis for print media and should understand the media theory relevant to signification such as denotation and connotation, so that they are able to analyse the chosen print product. Learners could look at the production processes for the chosen product through case studies, using sources such as the Internet, written material to inform their analysis. It may also present an opportunity, where possible, for learners to undertake a visit to printers of magazines or newspapers. Learners should be taught the principles of audience targeting. They should understand that media print products are aimed at people based on established demographics such as age, spending power, lifestyle and these demographics are used to create products that are of appeal and promoted to specific target groups. Learners could look at company marketing material and press pack information to inform their analysis. Their findings could be evidenced by outcomes such as written textual analysis, annotated material, slide presentation, blog, written report.

P2: If working as a team, learners should be encouraged where possible to discuss their ideas as a group and to record all ideas for evidence of both group and individual work. At this stage learners should try to generate a range of ideas and not restrict the possibilities based on the research undertaken for the professional print media product. If learners are holding meetings by setting an agenda and recording minutes, they may find it more beneficial to agree and distribute the agenda prior to the meeting, to reflect good working practice. Minutes or planning diaries should consider what was discussed at the meetings, what decisions have been made, any subsequent actions and who has responsibility for these; it is also an opportunity for learners to highlight their part in the process and any changes or revisions to the plans for the print media product/s. Ideas should take into account codes and conventions, formats of the print media product they are creating. They need to consider the house style, content, typical layout for their chosen media product. Suggested evidence for learners ideas could be produced as mood boards, spider diagrams, sketches or a written synopsis of their ideas.

P3/M1/D1: It is important wherever possible, that learners should use industry standard formats and terminology when producing the proposal. When producing their proposal learners should consider the possibility to develop their product further for example they could plan to develop the frequency of their print media product into a daily or weekly or monthly run, they would also need to give consideration to the potential content, continuity of issues etc. Learners should refer to their analysis in P1 particularly when considering how their selected ideas are appropriate for the needs of the target audience, demographics and lifestyle for instance. It may be useful for learners to have another practical print unit they intend to link this unit to in mind when generating ideas and particularly when producing sample pre-production material, such as images, draft layouts etc.

P4/M2: When presenting their ideas, proposals and sample pre-production materials to the editor or client or teacher in
the role of the editor or client or focus group learners should provide a verbal introduction to the presentation of their original print based products, which could be a formal or informal presentation. Learners should consider the layout of the room, appropriate use of equipment, which should be tested to ensure that it is functioning properly in advance of the presentation. Learners should ensure that their sample material is well presented and easily accessible to their client so that it enhances the presentation and illustrates the original proposal. If working as a group it is important that learners can demonstrate their contribution to this process, which could take the form of a witness statement from the teacher in the role of the client. The presentation could take the form of a slide show, portfolio of evidence in conjunction with a verbal presentation. It is suggested that some form of visual (i.e. photographs) or audio-visual recording of the presentation are produced by the learner or the centre. Learners should endeavour to pose probing questions about their product when seeking feedback. Evidence of feedback should take the form of written or verbal feedback, it is suggested that if the feedback is in verbal form the leaner makes some form of audio or audiovisual recording of the feedback. Some suggested ways of recording feedback include a completed questionnaire, an audio or audiovisual recording of the feedback, a written report, written response via email. Learners’ work should be supported by a witness statement from the client or teacher in role.

P5/M3/D2: It is important wherever possible, that learners should use industry standard formats and terminology when producing the production plan, particular consideration should be given to layout, headings, which should reflect industrial working practices. Learners should use feedback gained when planning the production plan for an original print-based media product. It may be useful for learners to have another practical unit they intend to link this unit to in mind when producing their production plan, particularly when considering the timescales, resources and launch date for the product, and how they will deploy their equipment and personnel with reference to a realistic budget. They should consider any constraints they have thought of themselves or gained through feedback and whether their idea will appeal to their target audience. When considering legal and ethical issues candidates should refer to the code of practice for the particular regulatory body, which affects the production of print media. Learners revisions to their pre-production material are based on the feedback gained and may include changes or additions to images, fonts, colours, layouts etc.

Learners should seek to evidence the grading criteria through a variety of mediums, (i.e. written format, written presentations, verbal presentations, audio content, audiovisual content) which highlight their particular strengths, however learners should be encouraged to stretch their skills and knowledge by using a range of mediums to evidence their work.
RESOURCES

This section provides suggestions of suitable resources. The list is neither prescriptive nor exhaustive, and learners should be encouraged to gather information from a variety of sources.

Some suggested resources are intended for tutor use. The resources in this section were current at the time of production.
